

- Free Design Mode
- OPC Client Functionality
- E-mail and Web Enabled
- Historical Trending, Alarming, Data Logging included in base price!
- NO yearly "maintenance" or "support" fees

Infilink HMI is a full featured, Windows based industrial automation software solution at a price that makes both of us money, not just the software vendor. It is ideal for a small PLC user with its fast, easy setup and run times at a cost 50% less than competitors! That 50% savings for "the same results" is 100% NET PROFIT. Why pay for gadgets you simply do not need? The extra gadgets can often make learning more difficult!
