Installation Considerations Installation Of Electronic Instruments In Industrial Environments | 129  |
New Products

130K Series
Miniature Counters, Timers & Ratemeters
130K/131K/132K/133K - Totalizers
134K/135K/ - Time Meters
136K - Ratemeter/Tachometer
Standard 1/32 DIN Case

See Pages 19, 80, 100 for Details

531 and 532
Temperature Displays
531 - Temp. Display for Pt100 and Ni100 RTD’s
532 - Temp. Display for J, K & N Thermocouples
Standard 1/32 DIN Case

See Pages 92, 93 for Details

CTR-544 & TR-545
Counter, Timer, Ratemeter
CTR544 - Counter, Timer or Ratemeter
TR545 - Totalizer and Ratemeter
Standard 1/8 DIN Case

See Pages 31, 54 for Details

PMT-555
Process Monitor and Totalizer from Analog Inputs
Standard 1/8 DIN Case

See Page 65 for Details

TR-910
Programmable Time Relay with LCD Display
Standard 1/16 DIN Case

See Page 88 for Details
**KE 610**

**6 Digit Counter, Non Reset**

**Features**
- Low Cost, Large Quantity Discounts
- Patented High Performance Mechanism
- UL & CSA Approved (KE610)
- Rugged Plastic Package
- Many Voltage Ranges Available
- Long Life

**Applications:**
The compact design and various mounting styles of the KE610 make it the ideal counter for almost all counting applications. This electro-mechanical counter will not lose its count during power failures or from electrical noise. The KE610 is used in:

- MAIL EQUIPMENT
- PHOTO MACHINES
- VENDING MACHINES
- GAMING MACHINES
- ELEVATORS
- COPY MACHINES
- TICKET MACHINES

**Description:**
The KE610 Series incorporates the latest manufacturing technology together with a patented basic design to achieve high performance over a wide temperature range with low power consumption. These counters can be mounted by 2 front flange styles, base flange, behind the panel (front mount), or rear screws. The KE610 has UL/CSA approvals and can operate over a wide voltage range of DC or AC power.

**Specifications:**
- Digits: 6
- Digit Size: 0.160" white on black. Colors available. Special 0-5-0-5 available.
- Operating Voltage ±10%:
  DC: 4.5, 6, 12, 24, 48, 115 (2W)
  AC: 24, 48, 120, 230 (5VA)
- Reset: None
- Count Speed: 10 CPS, standard. 50/50 ratio on/off.
- Max. On Time: Infinite
- Temperature: Storage: 14°F to 122°F (-10°C to +50°C), Operating: 23°F to 104°F (-5°C to +40°C).
- Approvals: UL# E60420, CSA# LR 91109-4
- Termination: UL/CSA wire leads, 10" long, standard.
- Specials: Many specials available. Consult factory.
- Weight: 4 oz. (113 g.)
**FL & F3 Flange Mount**

- **Series KE610 = 6 Digit**
- **Special Features**
  - **A** = Add Diode Suppression (DC only)
  - **.01** = Coin, 2 wheels red on black
  - **.05** = Coin, 2 wheels red on black
  - **mounting**
    - **FL** = Flange Mount 1.535" x 1.811"
    - **F3** = Flange Mount 1.811" x 1.811"
    - **F** = Front
    - **FB** = Front & Base
    - **R** = Rear Mount
    - **B** = Base Mount

**How To Order**

**EXAMPLE:** KE 610 A FB 10 DC 12

## E660, E760

### Features
- Low Cost, Large Quantity Discounts
- Rugged ABS Case
- Many Voltage Ranges Available
- Long Life
- Compact Size

### Description:
The E series incorporates the latest manufacturing technology together with a basic design to achieve high performance over a wide temperature range with very low power consumption. These counters can be mounted by snap-in front flange or rear screw mount.

### Applications:
The compact design and competitive pricing of the E660 and E760 make them the ideal counters for almost all counting applications. These electro-mechanical counters will not lose their count during power failures, or from electrical noise. The E660 and E760 are used in:

- Mail equipment
- Photo machines
- Vending machines
- Gaming machines
- Elevators
- Copiers and printers
- Ticket machines
- Laundry machines

### Specifications:
**Operating Voltage:** (+/-10%)  
DC: 5, 12, 24 (1.2W)  
**Display:** Six or seven digit, .110” (2.8mm) high. White on black.  
**Count speed:** 10 CPS standard. 15 and 25 CPS optional.  
50/50 ratio on/off.  
**Max. On time:** Infinite.  
**Reset:** None.  
**Termination:** UL/CSA wire leads, 13.78” (350mm).  
**Operating temperature:** 23°F to 104°F (-5°C to +40°C).  
**Storage temperature:** 14°F to 122°F (-10°C to +50°C).  
**Weight:** 1 oz. (28.35 grams).  
**Specials:** Many specials available. Consult factory.

### How To Order:
**EXAMPLE:** E660 A P 10 DC 12  
- **Series:**  
  | E660 = 6 Digit Counter | E760 = 7 Digit Counter |  
- **Special Order Features:**  
  | _ = Blank if standard | A = Diode across Coil | M = M3 Threads |  
- **Mounting:**  
  | P = Panel Mount | R = Rear Mount (4-40) | F = Front Mount (4-40) | FI = Front Mount (4-40) with inserts | RT = Rear Mount (4-40) with Terminal Pins for PCB Mount |  
  | B = Base Mount | K = Rear Mount with 4-40 screw between Terminal Pins |  
- **Count Speed:**  
  | 10 = 10 CPS (standard) | 15 = 15 CPS (optional) | 25 = 25 CPS (optional) |  
- **Operating Voltage:**  
  | DC |  
- **Voltage Level:**  
  | DC: 5, 12, 24 |

#### Rear Mount

CASE SLOTTED FOR SIDE EXIT OF WIRE

#### Front Mount

4-40 UNC 20 DEEP (5) (M3 optional)

#### Base Mount

K Option 4-40 UNC 20 DEEP (5) (M3 optional)

#### Pin Terminal Type

4-40 UNC 20 DEEP (5) (M3 optional)
**K0 Series**

**Features**
- UL Approved, CE Certified
- Super Small
- Low Power Consumption
- 4, 5 or 7 Digits
- 3 Mounting Styles
- Extended Temperature Option (-30°C to +85°C)
- Long Life

**Applications:**
- Dispensing Equipment
- Medical Equipment
- Copy Machines
- Gaming Machines

**Description:**
The K0 Series is a tiny 4, 5 or 7 digit totalizer. The armature system and novel anti-shock and vibration driving system provide a high degree of counting accuracy at a very low power consumption (250mW STD.; 30mW OPT.). Wear resistant materials provide a long maintenance free life, even at extreme temperatures. Versions supplied with a metal case provide electro-magnetic tamper-proof.

**Specifications:**

**Digits:** 4, 5 or 7 - 0.158" high, white on black.

**Weight:** 0.60 oz. (17g)

**Reset:** None

**Terminations:** Wire leads or PC board mount with silver-plated pins or optional .02" x .11" tabs.

**Approvals:** UL# E43429, CE Approved

**Temperature:** +14°F to +140°F (-10°C to +60°C)

**Count Speed:**
STD: DC 25CPS; (250mW)
MIN. on/off 20mSec

OPT: DC 10CPS; (30mW)
MIN. on/off 50mSec

**NOTE:** Power of 30mW must be maintained even on increase of temperature.

**AC:** 10CPS (.8VA);
MIN. on/off 50mSec

**How To Order:**

**EXAMPLE:** K0 7 .20 .35 12VDC

</tbody>
</table>

**Voltage:**
- 3, 5, 12, 24 VDC ± 10%
- 24, 110, 220 VAC ± 10%
(Other voltages available, Consult factory)

**Special Options**
- 0 = Low power DC versions (30mW), 10CPS
- ET = Extended Temperature -30°C to +85°C
**W15 Series**

**Features**
- Super Low Power
- 5 Digits
- 3 Mounting Styles
- 2 Termination Types
- Resettable
- Optional Extended Temperatures
- Low Cost

**Applications:**
W15 Series counters are well suited for battery operated traffic counters, vending machines, message accounting systems, and general event counting where a reset is required.

**Description:**
The W15 Series 5 digit counters combine low 60mW power and reset capability in a small housing just .790" high and 1.22" wide. The proven armature phase system combined with an anti-shock/vibration driving system provides a high degree of counting accuracy. Wear-resistant plastic insures a high rate of maintenance free service life.

**Specifications:**
- **Digits:** Five 0.067" white on black.
- **Weight:** 1.8 oz.
- **Operating Voltages:**
  - 3, 4, 6, 9, 12 VDC filtered ± 5%
  - 4, 6, 12, 24, 48, 110, 185 VDC unfiltered ± 10%.
  - 12, 24, 48, 110, 220 VAC.
- **Reset:** Manual, front push-button
- **Count Speed:** 10 cps standard; 8 cps (low power-filtered)
- **Max. on Time:** continuous
- **Temperature:** +14°F to +122°F (-10°C to +50°C) standard.
  - -22°F to +158°F (-30°C to +70 °C) optional.
- **Termination:** Wire leads 6" long or silver-plated pins 0.060" dia.
- **Color of Housing:** Black
- **Approvals:** CE Approved

**Features**:
- Super Low Power
- 5 Digits
- 3 Mounting Styles
- 2 Termination Types
- Resettable
- Optional Extended Temperatures
- Low Cost

Series
AW15.01 = Base mount
W15.01 = Rear stud mount
W15.21 = Spring clip mount

Termination
.3 = .060" (1.5mm) Solder pins (not available with AW type)
.2 = Wire leads 6" long

Operating Voltage
(specify, see count speed)
DC: 3, 4, 6, 9, 12, 24, 110, 185
AC: 12, 24, 110, 220

Count Speed
8 CPS: 60 mW DC; available voltages 3, 4, 6, 9, 12 VDC
10 CPS: 500 mW DC; available voltages 4, 6, 12, 24, 110, 185 VDC
10 CPS: .75 VA; available voltages 12, 24, 110VAC;
1.5 VA, 220 VAC

Options
Extended temperature: -22°F to +158°F
(-30°C to +70°C) add prefix “HT” to part number
Features

- 5 and 6 Digits with Reset
- 8 Digits Non-Reset
- Secret Rear Reset Option
- Reversed Colored Number Wheels
- UL Recognized Component, CE Certified
- Low Cost

Applications:
General purpose, high performance/low cost counter for monitoring manufacturing processes, flow totals, test cycles where accurate count must be displayed even when power is lost.

Description:
This counter series utilizes an all plastic housing and frame to achieve lower cost without sacrificing quality. Count life is 200 million minimum with optional speeds to 50 counts per second possible. Spring clip or two screw mountings are standard. Plug-in and rear stud mounting available on special order.

Specifications:

Count Life: 200 million.
Numbers: .160" (4mm) high.
Housing: Black plastic, 5, 6 or 8 digit,
Connections: .060" pins with push on connectors.
Count Speed with DC: 10, 25 count/sec. (optional 50 counts) per sec.
Count Speed with AC: 18 counts/sec.
Impulse Ratio: 60% on time, 40% off time (Min.).
Operating Voltage: 6, 12, 24, 48,110, 220 VDC;
24, 48, 110, 220 VAC
Operating Temperatures: +23°F to +104°F (-5°C to +40°C);
Shock: Unit meets IEC 068-2-27 for Shock Stability
Vibration: Unit meets IEC 068-2-6 for Vibration
Approvals: UL Recognized Component File# E60420,
CE Approved
Weight: 3 oz.
Max. Count Time: Continuous 50/50 or 60/40, on/off.

How To Order:

EXAMPLE: B 16 1 1 24VDC 25CPS

Series

B

Digits

15 = 5 digits
16 = 6 digits
18 = 8 digits

Mounting

0 = Non flange (for F1)
1 = Screw panel
2 = Spring clip
3 = Large screw panel

Reset

0 = Non-reset
1 = Manual push button
4 = Secret Reset

Voltages (specify)

6, 12, 24, 48, 110 and 220 VDC
24, 48, 110 and 220 VAC

Count Speeds (specify)

5, 10, 25 CPS DC
18 CPS AC

Available Options (add to end of part number)

K1B - Silicone cover #3 mount style
F1B Frame - with socket box 945-2
0 Mount only
945 - Socket box
F1DVS - Frame with locking cover
F1DK - Frame with knob closure cover
US - Key reset
N7 - Explosion proof
N7R - Explosion proof with Reset*
LT - Low temperature (-22°F to +115°F)
HT - High temperature (+14°F to +140°F)
50 counts per second (specify)
FL - 6" Wire Leads

RoHS Compliant
MK16 - 18

Electromechanical Totalizers
3, 4, 6 and 8 Digit

Features
- UL Listed, CE Certified
- Rugged Case
- Varied Mounting Styles
- 3, 4 and 6 Digits with Manual & Electric Reset
- Many Standard Voltages
- 250 Million Count Life, Minimum
- Many Options Available

Application:
Production counting, line counting (printers), events, fees, where count must be retained even if power is lost.

Description:
MK counters combine extra long count life, 250 million minimum, and absolute accuracy even with 10% voltage variation. Varied mounting styles. The spring clip mount gives the user a clean uncluttered panel. Installation is expedited by 0.020" x 0.11" quick push on connectors.

Specifications:
Display: 6 digit with manual or electric reset; 8 Digit without reset
Digits: .160" white on black wheels.
Operating Voltages: 5, 6,12, 24, 48, 110, 220 VDC; 12, 24, 48, 110, 220 VAC
Count Speed: 10, 25, 35 CPS standard VDC (40 or 50 CPS optional, see OPTIONS); 10, 18 CPS standard VAC only.
Temperature: +14°F to +114°F (-10°C to +45°C) standard
Housing: UL Listed, rugged, black, polycarbonate
Termination: Terminal pins 0.110" x 0.032 connectors supplied

Weight: 3 ounces
Max. Count Time: Continuous, 50/50 or 60/40 on/off pulse ratio.
Approvals: UL File#: E60420, CE Approved
How To Order

**EXAMPLE:** MK16 1 2 24 VDC 25 CPS

### Series
- MKS14 = 4 digits non reset (1.09” wide cutout)
- MK14 = 4 digits with reset (1.32” wide cutout)
- MKS16 = 6 digits non reset (1.32” wide cutout)
- MK16 = 6 digits with/without reset (1.89” wide cutout)
- MK18 = 8 digits non reset (1.89” wide cutout)

### Mounting
- 0 = Rear mount
- 1 = Screw panel
- 2 = Spring clip

### Reset
- 0 = Non-reset
- 1 = Manual push button
- 2 = Electric (6 digit only)
- 3 = Both (6 digit only)

### Voltages (specify)
- 5, 6, 12, 24, 48, 110 and 220 VDC
- 12, 24, 48, 110 and 220 VAC

### Count Speeds (specify)
- 10, 25, 35 CPS DC
- 10, 18 CPS AC

### Available Options (add to end of part number)
- V = Manual reset guard (6 digit version)
- US = Spade key reset (6 digit version)
- SR = Secret reset (6 digit version)
- SL = Manual subtract lever (one count per stroke)
- ML = Magnifying lens
- M = SPDT microswitch operated by manual or electric reset (MK16.11/M)
- FL = 6” wire leads
- LT = Low temperature (-22°F to +115°F)
- HT = High temperature (+14°F to +140°F)
- 40 or 50 counts per second (DC only)
- Counts by 2’s or 5’s
- TB = Terminal block
- Z = Mounting stud (rear)
- Reverse Color Wheels-black on white, red on black
- Special engraving - faceplate
- K6 = Flexible silicone cover for #2 mount style
- A = Base mount ex: AMK 16.01
- K4 = Silicone Cover (mK14.21)

### ENCLOSURES:
- N7 = Explosion proof (see accessories section)
- N12 = Oil and dust proof
- N4 = Weather and water proof

Add "R" for external Reset Button (Unit must be ordered with Electric Reset)
Features:
- 8 Digits Standard
- Meets NEMA 4X and IP65 Ratings
- Long Life (10 Year) Lithium Battery
- 10 kHz Count Speed
- Screw Terminal Block
- Slow Speed Input for Contact Closures
- High Speed Input for Sinking Inputs from a Max. of 18VDC Without Module
- Quadrature and High Voltage (10 to 240 V AC; 10 to 110 V DC) Inputs Optional
- UL Recognized Component

Description:
The KAL-D06 counters are small, lithium battery powered, totalizing counters that are panel mounted. The counters are designed as replacements for standard electro-mechanical counters. They use the latest custom CMOS technology and incorporate an 8 digit, 0.354” (9mm) high, LCD display.

It operates from a long life lithium battery (life 10 years) and can be operated from contact closure or high speed electronic devices. No separate alkaline batteries are required. The front reset button can be disabled if desired.

Specifications:
Battery: Non-replaceable Lithium battery, expected life of 10 years at 20°C
Display: 8 digit black LCD, Digit size 0.354” (9mm) high, leading zero blanking.
Backlight: backlight requires external 5V supply (±0.5V @ 20mA). 12V, 24V and 30V can be used with the use of an external resistor, see backlight wiring diagram for details and resistor values.
Reset: Panel or remote (can be disabled if desired)
Count Range: 0-99999999, rollover to 0
Temperature Range:
- Operating: 14 to 140°F (-10 to 60°C)
- Storage: -4 to 140°F (-20 to 60°C)
Battery Life: 10 years at 20°C (calculated)
Relative Humidity: 80% max. up to 31°C, decreasing to 50% max. at 40°C
Connection: Finger-proof screw terminal for wires up to 0.06”² (1.5mm²)
Sealing: NEMA 4X/IP65; Remove film from self adhesive gasket before use! Overvoltage Category II, Pollution Degree 2 (IEC 64)
Certifications: UL Recognized Component

High Speed Count Input:
- Sink input NPN
- R = Internal resistor 3.3MΩ
- Max 18V, threshold 1V
- Negative edge trigger
- Max. 10kHz, min. 50µS

Low Speed Count Input:
- Sink input NPN or contact closure
- R = Internal resistor 3.3MΩ
- Max 18V, threshold 1V
- Negative edge trigger
- Max. 30Hz, min. 15mS

External Reset Input:
- Sink input NPN or contact closure
- R = Internal resistor 3.3MΩ
- Max 18V, threshold 1V
- Negative edge trigger
- Min. 15mS

Direction Input:
- Sink input NPN or contact closure
- R = Internal resistor 3.3MΩ
- UP: Not connected or >2V (logic 1), max 18V
- DOWN: Connected to common or <1V (logic 0)
- Direction signal must change >5µS before Count signal.
KAL-DQUAD06 Wiring

1 - Count Input A
2 - Count Input B
3 - External Reset Input
4 - Not used
5 - External Power for Backlight and Input Circuit
6 - 0V, Common

Quadrature Input:
- Count Inputs A & B
  - Sink input NPN or push-pull signals, NOT source only
  - $R = \text{Internal resistor } 3.3\Omega$
  - Max. $+V$
  - Max. 2.5kHz
  - Mark to space ratio 1:1

KAL-D06AC/DC Wiring

1 - High Voltage Count Input
2 - High Voltage External Reset Input
3 - Common for pins 1 & 2
4 - Direction Input
5 - External Power for Backlight
6 - 0V, Common for pins 4 & 5

High Voltage Input:
- Count Input
  - Opto-isolated
  - $R = \text{Internal resistor } 50k\Omega$
  - 10 - 240V AC ±10%
  - 10 - 110V DC ±10%
  - Max. 10 pulses per second
  - Min 50mS

High Voltage Reset Input
- Opto-isolated
  - $R = \text{Internal resistor } 50k\Omega$
  - 10 - 240V AC ±10%
  - 10 - 110V DC ±10%
  - Min 15mS

How To Order:

KAL-D06 .......... 8 digit counter with 10 yr battery
KAL-DQUAD06 .... 8 digit counter with 10 yr battery
  with Quadrature Input
KAL-D06AC/DC .... 8 digit counter with 10 yr battery
  with High Voltage Input

Accessories
N7 - Explosion proof housing (see accessories section)
E200 - Outdoor Enclosure (see accessories section)
K192

**Features**

- Suitable for portable devices, vending and gaming machines, printers and copiers
- Can be used for simple counting, length- and distance measurement.
- Non-volatile memory (no battery)
- Wide temperature range and wide voltage supply range
- Very high reliability
- Small size and low cost

**Specifications**

- **Supply**: 8 ... 28 V DC with reverse polarity protection
- **Current consumption**: 3 mA maximum at 8 ... 24 V DC, 10 mA at 28 V DC
- **Count and reset input**: 8 ... 28 V DC
- **Max. Count frequency**: 100 Hz
- **Display**: 6-digit display, figure height 5 mm
- **Data backup**: EEPROM
- **Housing**: Dimension 19 x 33 mm, color: black
- **Operating temperature**: -40 ... +85 °C
- **Humidity**: 95 % RH +32 C for 2 hours
- **EMC**: according to EC EMC directive 89/36/EWG
- **Interference emission**: EN 50081-2/EN 55 011 Class B
- **Interference resistance**: EN 61000-6-2
- **Weight**: approximately 8 g
- **Memory capacity**: CMOS EEPROM. Nonvolatile memory has data retention in excess of 10 years without power.
- **Protection from**: inductive switch, alternator load dump

**Dimensions**

- Low operating current
- Very high shock and vibration resistance

**Ordering Information**

K192 = LCD PCB Mount Counter
**130K-133K**

**Battery Powered Counters with LCD Display**

**Features**
- Low price and high efficiency
- Large (8 mm) 8-digit LCD display,
- Optional backlighting
- Various counting modes: up /down, differential, quadrature and pulse doubling
- High voltage input for 10 to 260 V AC/DC voltage pulses
- NEMA4/IP65 Front Panel
- Screw terminals, RM 5 mm
- Lifetime of the battery approximately 8 years
- Locking of the reset key
- Operating temperature –10 to +60 °C

**Technical data**

**Power supply:** non-replaceable lithium battery (lifetime approximately 8 years at 20°C)

**Backlighting:** external electrical source 24 V DC +/-20 %, 50 mA

**Display:** LCD, 8 decades, 8 mm high characters

**Mode:**
- a. adding or subtracting (selectable)
- b. counting direction
- c. differential counting
- d. phase discriminator

**Display range:** –9999999 to 99999999, with overflow display

**Reset:** manual and electrical

**Counting inputs:**

**A. Standard DC Input** (max. 30 V DC)
- **Slow counting input:** max. 30 Hz NPN
- **Fast counting input:** max. 12 kHz (PNP), 7 kHz (NPN)

**Switching level:**
- NPN: Low: 0 to 0.7 V, High: 3 to 30 V DC
- PNP: Low: 0 to 0.7 V, High: 4 to 30 V DC

**B. High Voltage Input** (10 to 260 V DC/AC)
- **Counting input:** Optocoupler input, max. 30 Hz
- **Min. pulse time:** 16 ms

**Switching level:**
- Low: 0 to 2 V DC/AC, High: 10 to 260 V DC/AC

**C. Counting direction switching** (only DC-version)
- **Mode:** see order table
- **Contact input:**
  - Open Collector NPN (switching at 0 V DC)
- **Switching level:**
  - NPN: Low: 0 to 0.7 V, High: 3 to 5 V DC

**D. Reset Input** (only DC and high voltage)
- **Minimum pulse time:**
  - DC: 50 ms, high voltage: 16 ms
- **Contact input DC**:
  - NPN: Low: 0 to 0.7 V, High: 3 to 30 V DC
  - **High voltage input:** 10 to 260 V DC/V AC
- **Contact input**:
  - Open Collector NPN (switching at 0 V)
- **Switching level**:
  - NPN: Low: 0 to 0.7 V, High: 3 to 5 V DC

**Interference emissions:**
- EN 55011 Class B, EN 61000-6-2 EN 61010 Section 1 (only AC versions)

**Housing:** dark grey RAL 7021

**Operating temperature:**
- –10 to +55 °C

**Ambient temperature:**
- –10 to +60 °C

**Storage temperature:**
- –20 to +70 °C

**Protection:** NEMA4/IP65 front

**Weight:** approximately 50 g

* and high voltage on 131K and 132K
### Counters

- **X: 5** = no backlight
- **X: 6** = with backlight add $18.00

**RoHS Compliant**
**MICRO-KAL**

**Features**

- Self Powered (3.5 years)
- 4 Digits, 0.24" Character Height
- High Contrast LCD Display
- Simple to Install
- Integral De-bounce Circuitry

**Applications:**

- Applications where no power is available
- Amusement machines
- Portable equipment
- Dispensing machines
- Luggage lockers
- Copiers and printers
- Ticket machines
- Utility meters

**Description:**
The Micro-KAL1 features flying leads for remote contact closure input. The Micro-KAL1 increments the count when the contact is open. It may be panel mounted with the optional bezels supplied.

**Specifications:**

- **Supply Voltage:** 1.5V button cell type 386 or SR43.
- **Expected battery life:** 3-4 years at 68° F (20° C).
- **Display:** 4 digit black LCD, .24" (6mm) characters.
- **Count range:** 9999 display rollover to 0.
- **Count input:** 18 Hz maximum, contact closure. Operates on contact opening.
- **Reset:** Reset to zero on insertion of battery.
- **Operating temperature:** 32° to 122° F (0° C to +50° C).
- **Storage temperature:** 32° to 140° F (0° C to +60° C).
- **Material:** Clear poly-carbonate, black ABS bezel.
- **Environmental protection:** IP40/DIN40050.
- **Weight:** .26 ounces (7.5 grams).
- **Lead length:** 9.45" (240mm).
- **Approvals:** CE Compliant

**Dimensions:**

**How To Order:**

Micro-KAL1 ....................... Totalizer with flying leads
MINI-KAL

Features

- UL, CSA Listed, CE Certified
- 6 and 8 Digit models
- PC Board Mountable
- Low Power Consumption
- 10 kHz Count Speed
- Easily Integrated Into OEM Systems
- Add -Subtract (AS Version)

MINI-KAL1

Description:
The MINI-KAL series of small, easy-to-mount LCD counters can be mounted directly to a PC board, or, with SLIM-KAL, through two screw holes in a panel. They are useful for counting applications where space is tight, and where OEM instrument makers want a pre-designed counter.

The MINI-KAL is a PC board mountable, 6 digit counter which counts up to 10 kHz, and consumes less than 15 µA of current. Connections are via four pins on 0.1 inch centers.

The MINI-KAL-DAS is a small 6-digit electronic add/subtract totalizing counter, based on the latest CMOS technology and incorporates a 6-digit 6mm character height, high contrast LCD display.

MINI-KAL1AS

Description:
The MINI-KAL-DAS has been specifically designed to use minimal power—quiescent current less than 5 microamps making the unit ideally suited in low power battery applications. The counter will add and subtract count pulses at input frequencies up to 10 kHz making the unit suitable for use in position, length and distance measuring applications.

MINI-KAL 1

Specifications:

- Voltage: 3 VDC ± 0.4V (VDD)
- Current: 5µA typical
- Display: 6 digit, LCD, 0.2" high
- Temperature Range:
  - Operating: +14 to 122°F (-10 to 50°C)
  - Storage: -14 to 140°F (-20 to 60°C)
- Signal Inputs:
  - COUNT INPUT: Electronic 10 kHz max. (min. on/off 50µsec) Negative edge triggered, 0.7V threshold, TTL/CMOS compatible.
  - DIRECTION: Electronic input, TTL/CMOS compatible.
  - Add - logic 1 (VDD)
  - Subtract - logic 0 (0 to 0.7 V)
- RESET: Negative edge triggered 0.7V threshold, minimum pulse length 50 µS.
- Material: Clear PETP
- Weight: 3 oz. (75 grams)
- Sealing: IP40/DIN40050
- Dimensions: 27x175x65 mm

MINI-KAL2AS

Description:
The MINI-KAL2 AS add/subtract totalizing counters operate from an external 3VDC supply and feature an 8 digit high contrast LCD display with a character height of .315". The unit is suitable for PCB mounting and is available with or without the front panel reset button. Inputs are provided for count direction and external reset. The counter will add and subtract count pulses at input frequencies up to 10 kHz making it suitable for use in position length and distance measuring applications. With power consumption less than 10µA, typically 5µA, this unit is ideally suited in portable battery powered applications.
MINI-KAL2AS
Specifications:
Voltage: 3VDC ± 0.4V (VDD)
Current: 5µA typical, 10µA max. at 10 kHz
Display: 8 digit 8mm character height black LCD
Temperature Range:
  Operating: +14 to 122°F (-10 to 50°C)
  Storage: -14 to 140°F (-20 to 60°C)
Signal Inputs:
COUNT INPUT: Electronic input 10KHz max., negative
  edge triggered, 0.7V threshold, minimum pulse
  length 50 µS, TTL/CMOS compatible.
COUNT INPUT: Contact closure/open collector input,
  30 Hz max, negative edge triggered, 0.7V threshold,
  minimum pulse length 15 mS.
DIRECTION:  TTL/CMOS compatible.
  Add—logic 1 (VDD)
  Subtract—logic 0 (0 to 0.7 V)
EXTERNAL RESET: Contact closure/open collector
  input, negative edge triggered, 0.7V threshold,
  minimum pulse length 15 mS.
Connections: 6 PCB mounting pins on a 0.1 inch pitch.
Approvals:  UL File: E135458, CSA File: LR96702,
  CE Approved

CTR52U

Multipurpose Device Counter, Rate Meter and Timer

Features
- Universal, with dual functions, also suitable as maintenance counter
- 2 pulse or time counters for measuring daily and total values
- Count frequency 60 kHz
- Four dual functions in one device, saves on inventory costs
- Separate multiplication and scaling factor for pulse & frequency counter

Specifications:
Supply: 10 ... 30 V DC, voltage: with reverse polarity protection
Current consumption: max. 40 mA
Display: 6 digit red 7 segment LED display; 8 mm high
Data backup: EEPROM
Housing: Dimensions 48 x 24 mm (1.89" x 0.945")
according to DIN 43 700; RAL 7021, grey
Polarity of Inputs:
programmable, npn or pnp for all inputs
Input resistance:
appr. 5 kΩ
Counting frequency:
max. 60 kHz, can be damped to 30 Hz
Reset time: 5 ms
Resolution counter:
0.001 sec ... 999999 hr
Input switching level
Standard version:
Low: 0 to 0.2 x Input Power Voltage
High: 0.6 x Input Power Voltage to 30VDC
5 V version:
Low 0 ... 2 V DC
High 12 ... 30 V DC
Accuracy:
<0.1 % (Frequency display/Rate meter)
Ambient temperature:
–20 ... +50 °C (14°F ... 158°F), non-condensing
Storage temperature:
–25 ... +70 °C (-13°F ... 158°F)
EMC:
according to EC EMC directive 89/36/EWG
Immunity to interference:
EN 61000-6-4/EN 55 011 class B

Operating modes:
Electronic totalizer and frequency counter, counter with 2 totalizing ranges, totalizer and timer, timer with 2 time ranges

Emitted interference:
EN 61000-6-2
Protection: IP65 (from front)
Weight: appr. 50 g

Presets batch counting, length measuring, simple positioning, time control, speed control, rate control.

**Operating modes:**
Adding counter and frequency meter, counter with 2 totalizing ranges, timer and time meter, time meter with 2 time ranges.

**Specifications:**
- **Supply:** 10 ... 30 V DC, with reverse polarity protection
- **Voltage:** 90 ... 260 V AC
- **Current consumption:** max. 50 mA, 6 VA
- **Display:** 6 digit red 7 segment LED display; 14 mm high
- **Data backup:** EEPROM
- **Housing:** Dimensions 96 x 48 mm according to DIN 43 700; RAL 7021, grey
- **Polarity of inputs:** programmable, npn or pnp for all inputs
- **Input resistance:** appr. 5 kΩ
- **Counting frequency:** 60 kHz, can be damped to 30 Hz depending on operating mode
- **Reset time:** 5 ms
- **Input switching level:**
  - DC-version: 5 V version
    - Low: 0 ... 2 V DC
    - High: 4 ... 30 V DC
  - AC-version: 0= Standard
    - Low: 0.6 x Input Power Voltage to 30VDC
- **Voltage supply for sensors:**
  - 24 V DC ±15 %/100 mA at AC versions
- **Accuracy:** <0.1 % (Frequency display/Rate meter)
- **Ambient temperature:**
  - –20 ... +65 °C, non-condensing
- **Storage temperature:**
  - –25 ... +70 °C
- **EMC:** according to EC EMC directive 89/36/EWG
- **Immunity to interference:** EN 61000-6-4/EN 55 011 class B
- **Emitted interference:** EN 61000-6-2
- **Protection:** IP65 (from front)
- **Weight:** appr. 150 g

**Ordering Information**
- **Example:** CTR54U 0 0
- **Series:**
- **Input Level:**
  - 0= Standard
  - A= 5V level
- **Power Supply:**
  - 0= 90 to 260 VAC
  - 3= 10 to 30 VDC
- **Accessories:** NEMA4 wall mount enclosures available see NEMA-32 & LCN4X
K Series

Features
• Add and Subtract Counter
• Accepts Simultaneous Inputs
• Built-In Battery Backup
• 8 Digit LED Display
• Optically Isolated Inputs
• Accepts AC or DC pulses & Switch Closure Inputs
• 1” x 2” (25 x 50 mm) Standard Case Size

Applications:
Ideal when small size and fast count speeds are needed. Uses include piece part totals, flow totalization and other OEM machinery needing a simple LED totalizer.

Description:
The K series is a 4 or 8 digit totalizer electronic counter. Its unique count input accurately registers simultaneous overlapping pulses, is optically isolated, and accepts counts at speeds up to 100 kHz. Further, the K series has a “built-in” battery to protect against power failures, can be powered with DC voltage and pulsed with AC or DC voltages, and is built with CMOS L.S.I. circuitry. In addition, all K series 4 digit counters have open collector logic level zero output as an optional feature. The K series 5-30 VDC power, small size and standard built-in battery makes it the perfect counter for those demanding applications where good looks, long life, and a secure count are important.

Specifications:
Count Speed: 0-100 kHz
Reset: Follows count input selected above, overrides count and triggers on leading edge.
Number of Digits: 8; at 99999999 all digits “roll” to zero for continued counting.
Digit Size .170” high standard.
Power Supply: 5-30 VDC regulated or unregulated.
Current Consumption: 80 milliamps with all 8 digits lit to number 8.
Power Interruptions: Built-in battery. Power may be interrupted for up to 1 week without loss of count. Counter may be stored for six months before 24 hours operation will be needed for battery recharge. While on standby, display blanks to conserve energy.

Count Input: Five inputs may be selected.
SP: Simultaneous Pulses - Positive going signals from 5 V to 30 VDC. Simultaneous overlapping add and subtract pulses are accurately registered to 15,000 counts per minute, 2 millisecond minimum pulse widths. 10 kOhm impedance.
H: High Impedance - 0-100 kHz non-simultaneous input operation standard. Separate add and subtract inputs or common data input together with up/down control line. Input impedance is 10 K ohm. Use with 715-1 shaft encoder.
V: AC Pulses - AC pulses 120 VAC. 50 counts per second. 75 K ohms impedance.
O: Optically Isolated - 1500 Hz maximum input
S: Up/Down Control - Use this with KEP encoder model 715-2. 5 VDC positive going pulses are fed into a single terminal. When held high, the up/down control line adds the incoming pulses to the total. When allowed to go low, the incoming pulses are subtracted from the total. 10 K ohm impedance.

Mounting: Panel mounted or “spring clip”
Termination: Printed circuit board edge connector supplied-standard
Zero Output: Logic level zero output provides 300 milliamps of switching power whenever the counter passes through or idles at zero. This option is available in 4 digit models only.
Temperature: +32°F (0°C) to +130°F (+54°C)

High Speed, LED Electronic Counter

Features

• CSA Approved
• Counts Pulse Inputs Up To 10 kHz
• NEMA 4X / IP65 Front Panel
• 1/8 DIN Cutout
• Add & Subtract Capabilities

Applications:
This totalizing counter is perfect for high speed counting applications where a 6 digit total count is required.

Specifications:
Display: 6 digits, .55" high LED

Input Power:
110VAC ±15% or 12 to 15VDC
220VAC ±15% or 12 to 15VDC.
24VAC ±15% or 12 to 15VDC.

Current: Max. 250mA DC or 6.5 VA at rated AC voltage.

Sealing: Front panel sealed to NEMA 4X/IP65 specifications.

Excitation Voltage: (AC powered units only) +12VDC @ 50mA unregulated -10% +50%.

Memory: EEPROM Stores data for 10 years if power lost.

Input Types:
Standard: INPUT 3
This input is ideal for flowmeters that produce a DC pulse output. Also may be used with KEP 711 series or 715-1 encoders or PD & D series sensors. User can select high or low speed modes for debounce filtering. NOTE: For sinking driver inputs (NPN), use an external pull up resistor (2.2kΩ to 10kΩ) between pin 7 (+12VDC) and inputs used (pin 5 and/or 6).

Up/Down Control: INPUT 5
Count inputs on A, direction control input on B. When input B is "high" (4-30VDC), the count inputs on A will count up. If input B is low (open or <1 VDC), the count inputs on A will count down.

Quadrature: INPUT 9
Accepts pulses 90° out of phase for bidirectional counting. May be used with quadrature encoders. NOTE: The unit will only show rate of one direction (when A precedes B).

NOTE: All inputs can be ordered with mag. input (30 mV) option (see "How To Order").

Reset: Rear terminal, 4-30 VDC negative edge triggered.

Approvals: CSA File# LR91109-7, CE Approved

Typical Application:
MC Series (MCHA3)

This unit is a dual input, bi-directional totalizer only. This unit does not have presets, outputs or scaling available. Each pulse received on input A or input B equals one count. The Minicount has separate up and down inputs. Pulses on pin 5 (input A) will count up (add); pulses on pin 6 (input B) will count down (subtract), even if the pulses occur simultaneously. Low and high count speed debounce filtering is factory set, output relays are not supplied with this unit. The MC series is perfect for applications where a low cost, bi-directional totalizer is needed.

CTR-544 Series

Features
- Multipurpose device (programmable mode)
  – Display counter (adding and subtracting)
  – Position Monitor
  – rate meter
  – timer
- Display range –199 999 to 999 999
- Screw terminal connections
- Locking SET-Key for reset
- Option: Optocoupler output if $f = 0$, i.e. Operation indicator

Description:
The CTR-544 is a multipurpose device that can be programmed as a counter, position monitor, timer or ratemeter. It accepts DC pulse inputs up to 20kHz. It is a perfect solution for all high speed counting, timing and rate monitoring applications.

Specifications:
- **Supply voltage:** 10 to 30 V DC, with reverse polarity protection
  90 to 260 V AC 50/60 Hz mains hum suppression
- **Power consumption:** max. 2 W/6 VA
- **Display:** 6-digit, red 7-segment LED’s height 14 mm
- **Data backup:** EEPROM
- **Housing:** housing for control panel 96 x 48 mm acc. to DIN 43 700; RAL 7021, dark grey
- **Polarity of Inputs:** programmable, npn or pnp for all inputs
- **Input resistance:** appr. 10 kΩ
- **Input frequency:** 20 kHz, can be damped to 30 Hz (11 kHz max. for position display)
- **Reset time:** 5 ms
- **Timer resolution:** up to 0.001 s

Level of inputs:
- **DC version**
  - Low: 0 to 0.2 x UB [V DC]
  - High: 0.6 x UB ... 30 V DC
- **AC version**
  - Low: 0 to 4 V DC
  - High: 12 to 30 V DC
- **DC Output:** 24 V DC ±15 %/100 mA (AC powered units only)
- **Accuracy:** Ratemeter: <0,1 %
  Timer: < 50 ppm
- **Ambient temperature:** –10 to +50°C
- **Storage temperature:** –25 to +70°C
- **EMC:** according to EC EMC directive 89/36/EWG
- **Interference emissions:** EN 50081-2/EN 55 011 class B
- **Interference resistance:** EN 61000-6-2
- **Protection:** NEMA4/IP65 (front panel)
- **Weight:** appr. 150 g

Pulse Counters, Position Displays, Rate Meters, Time Meters & Combinations

New Family: Your choice for your application!

Features

- LED display with very high luminosity
- 0.315" (8mm) digit height
- 6 digit display
- DIN housing, 1.88"x.944" (48x24mm)
- Easy 2 button programming
- Connection with screw terminal
- IP65 NEMA 4X (front)
- NEMA 4X Wall Mount Enclosure (optional)
- Input pulse-shape variable (Schmitt Trigger characteristics)

520K
Simple Display Counter

- Display range 0..999999 with leading zero blanking
- Overflow condition will be indicated by displaying the count value without leading zero blanking
- Count frequency up to 10kHz (can be damped to 30Hz in setup)
- SET-key resets the counter to zero (can be disabled in setup)
- 1 count input
- 1 reset input

Order #: 520K.2

521K
Totalizer and Position indicator

- Display range -199999...0..999999 with leading zero blanking
- Overflow condition will be indicated by 1Hz flashing of display
- Count frequency up to 10kHz (can be damped to 30Hz in setup)
- SET-key resets the counter to zero (or selected preset number)
- 2 count inputs
- 1 reset input
- Multiplying factor (0.00001...99.9999)
- Option: optocoupler output if count value ≤ 0
- Counting with direction input, differential counting, counting with phase discriminator (also with pulse doubling)

Order #: 521K.1 w/optocoupler
521K.2 w/out optocoupler

522K
Frequency meter and Tachometer

- Display range 0..999999 with leading zero blanking
- Indicates rate per sec or min (1/Tau) to 0.1% accuracy
- Overflow condition will be indicated by 1Hz flashing of display
- Input frequency up to 10kHz (can be damped to 30Hz in setup)
- 1 count input
- Operating principle: period duration measurement (average value at higher frequencies)
- Option: optocoupler output if frequency f=0 (e.g. no operation indicator)
- Multiplying factor (0.00001...99.9999)

Order #: 522K.1w/optocoupler
522K.2 w/out optocoupler

523K
Time meter

- Display range 0..999999 with leading zero blanking to 0.03% accuracy
- Lowest digit's decimal point flashes when timing
- Timing in s, min, h or h.min.s (programmable) Timing resolution x1,.1,.01,.001, fixed by selected decimal point
- SET-key resets the counter to zero
- Gate, start and stop via 2 inputs (programmable)
- 1 count input
- Operation mode: Precise timing from hours to 1/1000 sec
- Option: optocoupler output (e.g. Timing indicator, 0.5 sec On/Off)

Order #: 523K.1 w/optocoupler
523K.2 w/out optocoupler

524K
Multipurpose device

- 521K-523K in just one device
- Operation mode can be programmed

Order #: 524K.1 w/optocoupler
524K.2 w/out optocoupler

NOTE: E200 Outdoor Enclosure and N7 Explosion Proof Housing available for all Models (see accessories section)
525K
Adding Counter and Tachometer

- Display range 0..999999 with leading zero blanking
- Overflow condition will be indicated by 1 Hz flashing of rate value and leading zeros of totalizer
- Count frequency up to 10kHz
- Indicates rate / sec or min (1/Tau)
- SET-key resets the counter to zero (can be disabled in the setup)
- Key to switch rate / total display
- 1 count input
- 1 reset input
- Separate multiplying factors for totalizer & ratemeter (0.00001...99.9999)
- Operating mode: Rate meter: 1/Tau (average value at higher frequencies)

Order #: 525K.2

526K
2 Display Counters

- Display range 0..999999 with leading zero blanking
- Overflow indicated by the leading zeros
- Count frequency up to 10kHz
- SET-key resets the counter to zero (can be disabled in the setup for each counter separately)
- Push-button for switching between counter 1 and counter 2
- 1 count input
- 1 reset input (programmable for each counter separately in setup)
- One multiplying factor (0.00001...99.9999)

Order #: 526K.2

527K
Display Counter and Time meter

- Display range 0..999999 with leading zero blanking
- Overflow shows leading zeros
- Lowest digit's decimal flashes when timing
- Adding counter: Decimal point only optical function
- Hour meter: Timing in s, min, h or h.min.s (programmable)
- SET-key resets the counter to zero (can be separately disabled in the setup for each channel)
- Push-button switches adding counter / time meter
- Count frequency up to 10kHz
- 1 count input
- Gate, start and stop via 1 input (programmable)
- 1 reset input (can be disabled in setup)
- Multiplying factor (0.00001...99.9999)

Order #: 527K.2

528K
2 Time meters

- Display range 0..999999 with leading zero blanking
- Active timing will be indicated by flashing the lowest digit's decimal point (one control)
- Timing in s, min, h or h.min.s (programmable) Decimal point fixes the resolution (ex: 1, 0.1, 0.01, 0.001)
- SET-key resets the counter to zero (can be separately disabled in the setup)
- Push-button for switching between time meter 1 and 2
- Gate, start and stop via 2 inputs (programmable)
- 1 reset input (programmable for each timer separately in setup)

Order #: 528K.2

529K/530K
Analog Displays

- Display range -19999.0..99999 with leading zero blanking
- Resolution 14 bit
- 5 digit display 6 digit total display (530K)
- 4 different resolutions (0..20mA; 4..20mA; 0..10V or 2..10V)
- Scaling factor for displayed value
- Automatic storage of maximum and minimum value (can be disabled in setup)
- Input to activate storing of displayed value

Order #: 529K.2 = Rate Display Only
530K.2 = Rate and Total Display

NOTE: E200 Outdoor Enclosure and N7 Explosion Proof Housing available for all Models (see accessories section)

Electrical characteristics:

- Supply Voltage: 10 to 30 VDC
- Data retention: EEPROM (1 million cycles or 10 years)
- Noise immunity acc. to EN 50081-2; EN55011 class B; EN 50082-2
- Ambient temperature: 14°F to 122°F (-10°C to +50°C)
- Input sensitivity: Low: 0 to 1 VDC High: 4 to 30 VDC
- Input resistance: 10 k ohm
- Polarity of inputs: programmable for all inputs in common
- Optocoupler: Max 30VDC, 10 mA, 1V drop @ 10 mA

Features

- 5 Large Digits
- Visible Setpoint Number
- Counts Up With Output at Preset
- 5 Amp, Form C Switch
- Many Voltages Available
- Rugged Case (50 x 50 mm)

Applications:
For counting and controlling industrial processes and production quantities. Offers high noise immunity while displaying number of items and preset number even if power is lost.

Description:
The BVA is a 5 digit preset counter loaded with features never before offered. The BVA has 2 registers. One shows the set point continuously. The other totalizes the incoming pulses. At coincidence, a 5 Amp form C relay transfers. The totalizer meanwhile continues adding any incoming pulses to the total providing an accurate tally of overrun. One hand sets the BVA. Simply push the conveniently located set buttons and change the preset register. All standard voltages are available in a 50 x 50 mm rugged plastic case.

LED Preset Add/Subtr. Counter, Timer, Frequency Meter

Applications:
Preset batch counting, length measuring, simple positioning, time control, speed control, rate control.

Description:
The CTF5 is a LED preset counter, timer or frequency meter. The following features are programmable: operating mode (output at 0 or preset, with or without autoreset), decimal point, polarity of input (NPN or PNP), output signal latched or timed, gate time (frequency meter), time resolution (Hrs., Min., Sec; timer).

Inputs:
Input A, Input B: Count inputs. Max. count speed is 30 Hz or 10 kHz separately selectable for both inputs.
Gate: Voltage level gate input;
Counter & Freq. Mode - inhibits counts when activated.
Timer Mode - Starts timing when activated.
Reset: Edge triggered reset input; it is connected in parallel with the front reset key and resets the counter to 0 (add) or preset (sub).
Latch: Voltage level input for display hold; when activated, the display "freezes" the current count value while counting continues in the background. The display updates when this input is de-activated.
Key: Voltage level keyboard lock input; when activated, all front keys are disabled.

Selection of Basic Function:
1. Impulse Counter
2. Frequency Meter
3. Timer

IMPULSE COUNTER
Decimal Point: 0 to 3 (for display only)
Scaling Multiplier: 0.001 to 9.999
Output Signal: Timed signal (0.01 to 99.98 sec) or Latched signal (00.0) selectable. (99.99 setting gives inverted latched output- output activates at power on and deactivates when preset is reached)
Polarity: Negative (NPN) or positive (PNP) polarity of inputs. Polarity selected applies to all inputs.

Input Modes:
E1: One count input (Input A) and one count direction input (Input B). If direction input is open, the counter adds, if it is activated the counter subtracts.
E2: Separate inputs, one up input (Input A) & one down input (Input B).
E3: Quadrature input, accepts two pulse inputs ±15° out of phase for direction control.
E4: Quadrature (x2) input, counts leading and falling edge of input A.

FREQUENCY METER
Gate: Gate time selectable from (0.01 to 99.99 sec) All pulses counted during this time will be displayed for one gate time (i.e. gate time of 1 will display Hz).
Decimal Point: 0 to 3 (for display only)
Polarity: Negative (NPN) or positive (PNP) polarity of inputs. Polarity selected applies to all inputs.
Input Modes: As described under Impulse Counter.
Scaling Multiplier: 0.001 to 9.999
Output Signal: Output activates for selected time (0.01 to 99.98 sec) when display reaches or exceeds preset value; If output time setting is 00.00, the output will activate when display reaches or exceeds the preset and deactivate when below preset. (99.99 output setting gives inverted latched output- output activates only while timer is running and deactivates when preset is reached.)

TIMER
Time Resolutions: Times in sec., min. or hrs. with resolution in 0.001, 0.01, 0.1 or 1.0 (depending on decimal).
Polarity: Negative (NPN) or positive (PNP) polarity of inputs. Polarity selected applies to all inputs. (Gate controls timing)
Output Signal: Timed signal (0.01 to 99.98 sec) or Latched signal (00.0) selectable. (99.99 output setting gives run time control latched output- output activates only while timer is running and deactivates when preset is reached.)

RoHS
2002/95/EC
Specifications:

**Operating Voltage:** (All voltages ± 10%)
- A: 115VAC 50/60Hz
- B: 220VAC 50/60Hz
- C: 11 to 30 VDC

**Power Consumption:**
- DC: 100 mA max.
- AC: 4 VA max.

**Display:** 7 segment LED 5 digit 0.295" (7.5 mm) high.

**Count Speed:**
- 30 Hz or 10 kHz (7.5 kHz for input mode E4 "Quad x2"): 1 kHz for autoreset without count loss (600 Hz for input mode E4 "Quad x2") separately dip-switch selectable for both inputs.

**Min. Pulse width for Control Inputs:** 5 msec

**Input Impedance:**
- Logic "0": 0 to 1 VDC
- Logic "1": 4 to 30 VDC

**Control Output:**
- Relay: SPDT 3A relay, 250 VAC / 300 VDC max. Switching current for DC min. 30 mA
- Opto-Isolated Output: Open collector and emitter
  - Max. Voltage: 30 VDC
  - Max. Current (ON state): 5 mA @ 0.4 V drop; 15mA @ 2.0 V drop

**Response Time:**
- Relay: Approx. 6 msec
- Opto-Isolated: Approx. 1 msec

**Output Power (AC powered units):**
- 24 VDC -40% / +15%, 80mA, unregulated

**Memory:** min. 10 years or 10^6 memory cycles

**Operating Temperature:** 32°F to + 122°F (0°C to +50°C)

**Noise Immunity:** EN 55011 class B and prEN 50082-2

**Storage Temperature:** - 13°F to + 158°F (-25°C to +70°C)

**Weight:** Approximately 9 oz. (240g) (AC version with relay)

**Protection:** NEMA 4/IP65 (front)

**Approvals:** UL File# E224909, CE Pending

**Series**

- Operating Voltage
  - A = 115 VAC
  - B = 230 VAC
  - C = 11 to 30 VDC

**Outputs**

- 0 = Relay
- 1 = Opto-Isolated collector and emitter
Features
- 6-Digit Preset Counter with Sign & Scale Factor
- Available with One or Two Presets
- Programmable as a Pulse Counter, Frequency Meter or an Operating Time Counter
- Wide-Range Power Supply 90-250 VAC
- Counting Speed up to 20 kHz
- Extremely Simple Use and Programming by Means of Only 4 Keys
- RS-232, RS-422 or RS-485 Serial Interface

Applications:
Preset batch counting, length measuring, simple positioning, time control, speed control, rate control.

Description:
The CTF16/17 is a LED preset counter, timer or frequency meter. The following features are programmable:
- Operating mode (counter, timer or ratemeter)
- Polarity of the inputs (NPN or PNP)
- Scale factor
- Output signals: continuous or pulse signal
- Frequency meter display mode: 1/s or 1/min
- Resolution in s, min, h or h:min:s
- Start and Stop for the time counter/hours meter

Inputs
2 counting inputs
The maximum frequency is 20 kHz (12 kHz for Quad Input); 30 Hz debounce setting for contact closure inputs.

GATE
Inhibits count, controls timer

RESET
Edge triggered, Resets the counter to zero when counting up, and sets it to the preselected value when counting down. (Same as front reset button)

KEY
The keys are locked as long as this input is ON. The P preselection display key remains active.

Outputs
1 or 2 potential-free relay or optocoupler outputs as ordered.

Programming
The CTF16/17 are programmed by means of the 4 front keys. The display prompts simple and intuitive programming.

Programmable are:
- Input polarity
  Positive (PNP) or negative (NPN). The selection is valid for all inputs.

6-Digit LED Preset Add/Subtr. Counter, Timer, Frequency Meter

Pulse or time counting modes
- Adding with counting start at 0
- Subtracting with set to preset (CTF16) (preset 2 for CTF17)
- Adding with automatic reset
- Subtracting with automatic set to preset (preset 2 for CTF17)

Input types in pulse counter mode
Cnt. Dir: 1 counting input; 1 counting direction input
uP, Dn: 1 adding input; 1 subtracting input
quad: Phase discriminator to connect pulse sources with 2 signals shifted by 90°
quad2: Phase discriminator with double pulse processing, to connect pulse sources with 2 signals shifted by 90°

Decimal places
Select one, two or three decimal places.

Scale factor
Multiplying scale factor between 0,0001 and 99,9999.

Output signal
Each output can be selected as an opening signal, a closing signal or as a positive or negative pulse signal.

Time counter
Select time base of h, min, s or h:min:s. Set the resolution by selecting up to 3 decimal places.

Frequency meter/Tachometer/Speed indicator
Display in 1/min or 1/s with automatic conversion.

Interfaces
The devices can be fitted with the optional RS 232, RS 422 or RS 485 interfaces. These interfaces can be used to program the devices as well as for remote reading. They are simply controlled by ESC sequences.

Explosion Proof Housing Option
- All functions corresponding to type 717 with relay output
- Sturdy, hard-coated aluminium housing with insert moulded connection cables (2 x 3 m)
- Protection type: EEx d IIC T6
- PTB approval no.: Ex-96. D. 1024

Specifications

Display: 6 digits, 7 segment LED’s, height 8 mm
Presets: 2 preset values for model CTF17
1 preset value for model CTF16
Counting inputs: 2 counting inputs, 4 types of programmable inputs
Polarity of the inputs: programmable, common to all inputs
Input resistance: Approximately 10 kΩ
Max. frequency: 20 kHz, can be set to 30 Hz for contact closure inputs
Minimum pulse duration for control inputs: 5 ms
Input switching level: Log "0": 0 to 1V
Log "1": 4 to 30V
Pulse shape: any shape (Schmitt-trigger)
Output: Programmable output state (energised (N.C.) or de-energised (N.O.))

NOTE: When high to low output selected ("L" → "H"), the output is activated when unit is powered and display is below preset. This may appear reversed.

Relay:
CTF16: 1 SPDT
CTF17: 1 SPDT; 1 SPST
Switching power: 250 V @ 3A Max
DC Max 50 Watts, Min 30mA
Optocoupler: Off: 30 VDC max
On: 2V @ 15mA, 0.4V @ 5mA
Supply voltage: 90 to 250 VAC, 5VA max, or
10 to 30 VDC, 1W max
Supply voltage output for external sensors:
24 VDC, 100mA (AC versions)
Accuracy of speed indicator mode: < 0,1 %
Accuracy of timer mode: ± 50 ppm
Output response time: Relay: approximately 7 ms
Optocoupler: approximately 2 ms
Data storage: at least 10 years or 10^6 recording cycles
Interference immunity: EN 61000-3-3, EN 55011 class B and EN 50082-2 with shielded control lines
Operating temp.: -10°C...+50°C
Storage temp.: -25°C...+70°C
Weight: approximately 200 g. (AC version & relay)
Protection: NEMA4 (IP 65) Front Panel

**KEPTROL**

**Features**
- Counter, Timer or Ratemeter
- Counts Up To 100 kHz
- 8 Digit Display
- Input Scaling
- Batch Counter
- DC Output to Power Peripherals Sensors
- NEMA 4X / IP65 Sealed Front Panel

**Counter, Timer or Ratemeter**

**Features**
- Counter, Timer or Ratemeter
- Counts Up To 100 kHz
- 8 Digit Display
- Input Scaling
- Batch Counter
- DC Output to Power Peripherals Sensors
- NEMA 4X / IP65 Sealed Front Panel

**Applications:**
Metering, Rate Monitoring, Cut to Length, Coil Winding, Batch control, all in one programmable unit.

**Description:**
Featuring 8 digits of bright .55 inch alpha-numeric display, the KEPTrol can accept up to 100,000 pulses per second of digital count or rate data, and time in keyboard selected ranges of 1/10,000 of a second to hours. The unit can multiply the input from 0.0001 to 99.9999 to easily understood units of measurement and give two control outputs at separate set points.

Selection of counter, timer or rate meter function as well as input scaling, timer frequency, preset levels, output timing and special security number are entered on the sealed front keypad by following instructions written on the display.

The unit operates from either 110 VAC /12 to 27 VDC or optional 220 VAC /12 to 27 VDC. If AC power is used, two built-in regulated 12 VDC ~100 mA power supplies are offered. They can be connected to provide + 12 VDC and -12 VDC or + 24 VDC to drive external devices. CMOS logic is used to provide high noise immunity and low power consumption with EEPROM to hold data a minimum of 10 years if power is interrupted.

Integrating the KEPTrol with computers or programmable controllers is made easy by optional RS232 or RS422 interface. Up to 15 units can be addressed separately to set control points or access data through the I/O ports.

**Specifications:**
- **Display:** 8 digit .55" high, 15 segment red orange LED.
- **Input Power:** A: 110 VAC ± 15% or 12 to 27 VDC. B: 220 VAC ± 15% or 12 to 27 VDC.
- **Current:** Max. 280 mA DC or 5.3 VA at rated AC voltage.
- **Output Power:** (on AC powered units only): + 12 VDC @100 mA. Separate isolated 12 VDC @100 mA to allow ±12VDC or +24 VDC, regulated ± 5% worst case.
- **Memory:** EEPROM stores all program and count data for minimum of 10 years if power is lost.
- **Approvals:** CE Approved

**Pulse Inputs:** Various inputs may be ordered from standard plug-in input cards.

2A: Simultaneous Pulses:
Use for count or rate modes only. Separate pulses on input A count up, pulses on input B count down without loss of count even if pulses come at the same time. Open or 0 to 1 VDC (low), 3 to 30 VDC (high), 10 kOhm impedance. Max speed 10kHz (min. on/off .05 msec) (Internal switch to select debounce filtering to max. speed of 40, 400, or 100 kHz) (Board #2102)

3A: Standard. High Impedance Up/down Control. Use for count, time and rate modes. Input A accepts all pulses for count, rate, time stop. Input B controls direction of count (low: counts down, high: counts up), starts timer. Open or 0 to 1 VDC (low), 3 to 30 VDC (high) 10K Ohm impedance. 100 kHz max. speed (min on/off 5 sec., 13µsec, if direction is changed). Min 13 µsec delay required after up/down level change before count pulse. May be used with KEPT encoder 715-2.

3B: Same as 3A input but has 4.7K Ohm high pull up resistors to +5VDC on inputs A and B for pulsing with contact to ground or NPN open collector transistor.

3C: High Impedance Separate Up/down: Use for count or rate modes only. Same specs as input 3A but separate pulses on input A count up, pulses on input B count down. Inputs must be normally low. (If input A is high, input B counts up on positive edge. If input B is high input A counts down on positive edge). May be used with KEPT encoder 715-1.

3D: Same as 3C input but has 4.7K Ohm input pull up resistors to +5VDC on inputs A and B.

NOTE: Inputs 3A, 3B, 3C, 3D as well as debounce filtering to max. speed of 40, 400 or 100 kHz are selectable by internal switches on any series 3 input card.

4A: Optically Isolated Up/down Control 5 to 12VDC: Use for count, time and rate modes. Input A accepts all pulses for count, rate, time stop. Input B controls direction of count (low: counts down, high: counts up), starts timer. Open or 0 to 1.5VDC (low), 5 to 12VDC (high), 1.1K Ohm impedance. Max speed 1500 Hz (min. on/off .33 m sec. Min. count delay after up/down change.

Kessler-Ellis Products • 800-631-2165
4B: Same as 4A, but input voltage is open or 0 to 2 VDC (low), 12 to 24 VDC (high), impedance 2.2K Ohm.
4C: Optically Isolated Separate Up/down, 5 to 12VDC: Use for count or rate mode only. Same specs as input 4A, but separate pulses on input A count up, pulses on input B count down. Inputs must be normally low. (If input A is high, input B counts up on negative edge if input B is high, input A counts down on positive edge).
4D: Same as input 4C but input voltage is open or 0 to 2 VDC (low) 12 to 24 VDC (high), impedance 2.2K Ohm.

NOTE Inputs 4A, 4B, 4C, 4D as well as debounce filtering to max. speed of 40 or 1500 Hz are selectable by internal switches on any series 4 input cards. (#2098)

9A: Quadrate Input: Use for count or rate mode only. Accepts pulses 90° out of phase for up/down counting. Open or 0 to 1VDC (low), 3 to 30 VDC (high), 10K Ohm impedance, 20 kHz max speed (min on/off .025 msec) (Internal switch to select debounce filtering to max. speed of 40, 400 or 20 kH.z.) (Board #2135) May be used with KEP 716 encoder

1A: Quad (x2) 5-30 VDC
1B: Quad (x4) 5-30 VDC

Reset: Front push-button CLR and remote reset input requirements follow pulse input selected. High level reset overrides other inputs. Min. on time, 5 msec.

Scaling: Any input from an external source or the internal time base can be multiplied by any number from 0.0001 to 99.9999. Press C to see scale factor. To change scale factor, press CLR and key in new factor. Press ENT to load in the displayed factor.

Preset: Two levels (8 digits) or one preset (8 digits) and one batch preset (8 digits). The preset numbers can be displayed or updated at any time by pressing A (preset A) or B (preset B). Enter the flashing preset number or press CLR and key in a new number and ENT to enter it. Output time from 0.1 sec. to 9.9 sec. or latched till reset is selected by RELAY mode set up.

NOTE The RATE METER mode has a floating decimal point. If a preset with a decimal is needed in the RATE METER mode only, use D to key in a decimal when setting up preset numbers. Outputs are active at or above preset rate and "off" below preset rate.

Control Outputs: (each of 2 outputs).
1. NPN transistor version: (Standard) Open collector sinks max. 250 mA from max. 30 VDC when active. (when relay is used, 10 VDC is provided at transistor outputs through relay coil. If greater than 2 mA is used, relay will remain energized. Applying greater than 10 VDC may destroy unit. Transistor will sink 100 mA in "on" state.)
2. SPDT Relay version: 10A 120/240 VAC or 28 VDC

Temperature: Operating +32°F (0°C) to +130 °F (+54°C). Storage: -40°F (-40°C) to + 200°F ( + 93°C)

Mode Selection: All following functions are selected by front keypad. Following prompts written on the display, choose the basic device type, relay output operation, outcard data interface and panel lockout security code.

Ratemeter: Accurate to 51/2 digits ± 1 display digit. It can be programmed to accept almost any number of pulses per unit of measurement, sample from 2 to 24 seconds maximum, perform weighted averaging from 0.0 to 9.9. [[old data x wt + new data + wt. + 1]] and auto-range up to 6 digits of significant information. Two levels of preset are standard. Outputs are active at or above the preset rate and return to the rest state when reading drops below the preset rate.

Counter: 8 digits of count with 2 levels of preset or 1 level of count preset and 1 level of batch preset Counter is designed to advance on negative edge of pulse. Choose between reset to zero or set to preset. Other choices include: manual reset, auto recycle at preset A, alternate action (counts to preset A, activates output A, counts to preset B, drops out output A.) or batcher. In the batch mode, the unit counts to preset A, activates output A, recycles and advances separate batch counter one count. At a preset number of batches output B is activated until batch counter is reset. At any time the display can be made to flash the batch total by pressing ENT while the unit is running. Activating CLR while the batch total is flashing resets the batch counter and the B preset output.

Timer: Choose from 1 to 10,000 pulses per second or minute basic time base with accuracy to +.015% and scale base from 0.0001 to 99.9999 to time in seconds, minutes, hours or days. Timing is controlled by positive edge of signal by one of three ways selected on the keypad:
   Level: Times while input B signal is high
   Pulsed: One positive pulse on input B starts timer, second positive pulse on input B stops timer
   Start-Stop: Positive pulse on input B starts timer, positive pulse on input A stops timer

Once the time base is selected and the timing started, the unit operates much as a counter. All the features listed under "Counter" are available with the timer. (See section under "Counter" operating modes)

Relay: Control output timing is selected by pressing D until the RELAY mode is selected and entered. Time duration from .1 to 9.9 seconds (or 00 for latch output) may be entered for A and B outputs. Once the output has been activated, unit must be reset before another output will occur. The control output timing is independent of the counter/timer reset which is selected under its setup modes. In the RATE MODE of operation the outputs are active at or above the preset rate and return to the rest state when the reading drops below the preset rate.

Lockout: Unauthorized front panel changes can be prevented by entering a user selected 4 digit code in the LOCKOUT mode. The status of the unit can be observed but "LOCKOUT" appears if changes are attempted. Entering the code returns the unit to "LOCK OFF" status.

Outcard: RS232 or RS422 serial 2 way communication options are available. Up to 15 units can be linked together and addressed separately to transmit unit status or accept new set points in the standard ASCII format. Baud rates of 300, 600,1200, 2400, 4800 or 9600 as well as choice of odd, even, space or mark parity can be selected by keypad control.

Opt 2: RS 422 serial interface.

Positrol

Low Cost, Pulse Input Position Monitor

Features

- 2 Control Set Points with Selectable Start Point
- 5 Digit Floating Point Decimal Scaling Factor
- Display From -99999 to 999999
- Pulse Input - 30 kHz Maximum
- Separate Up and Down Inputs
- Quadrature & Pulse Input with Up/down Control
- NEMA 4X / IP65 Sealed Front Panel

Application:
Any position monitoring application where 2 alarm setpoints and a 6 digit LED display is needed, such as blade positioning, box making and many other machine shop and industrial applications.

Description:
Featuring 6 digits of bright, 7-segment LED displays, the Positrol is a position monitor which accepts signal inputs up to 30 kHz. A 5 digit floating decimal scale factor allows a readout in true engineering units. The unit has two, programmable alarm set points from -99999 to 999999 and a selectable start point. These setpoints control two 5 Amp relays. A two stage panel lock prohibits menu changes from unauthorized personnel.

Specifications:
Display: 6 digit, .55” high, 7 segment, red orange, LED.
Input Power: 110 VAC ± 15% or 12 to 15VDC.
220 VAC ± 15% or 12 to 15VDC.
Current: 300 mA DC max or 8.0 VA at rated AC voltage.
Output Power: (AC powered units only)
+ 12VDC @ 50mA unregulated -10 +50%
Temperature:
Operating: +32°F (0°C) to +130°F (+54°C).
Storage: -40°F (-40°C) to +200°F (93°C).
Memory: EEPROM stores data for ten years if power is lost.
Inputs: DC pulse input open or 0-1 VDC (low), 4-30 VDC (high), 30 kHz speed max.

Reset:
Front Panel: resets display to view (start) value.
Remote: 4-30VDC positive edge, Resets display to view (start) value.

Lockout: Unauthorized front panel changes can be prevented by entering a user selected, 5 digit code. The lockout feature can be programmed to lock the entire front panel or lock the menu items and leave the presets and reset accessible. In either mode the locked items can be viewed but not changed.

Control Outputs: 2 each N.O. Relays - 5 Amp @ 120/240 VAC or 28 VDC. (N.C. Relay contacts or NPN sink from 10 VDC to .5 VDC @ 100 mA available with solder jumpers). The output will remain active when the display is equal to or greater than the set point. If the display falls below the set point, the output becomes inactive.

Set Points: Two control set points are provided. The set points can be programmed for any number from minus 99999 to plus 999999. The Positrol will recognize new set point values without the need to reset the unit. The unit also has a starting point which can be viewed or changed by pressing the "view" button. When the reset is activated, the display will reset to the view (start) value.

Shipping Weight: 2 pounds.

Approvals: CE Approved
Typical Application:

The POSITROL position monitor can be used in many position applications. When two units are used, both X and Y axes positions can be monitored. The application below involves monitoring of the X axis only.

In this application the STOP position on a sheet metal shear must be monitored. A KEP model 230 quadrature encoder was placed on the screw drive shaft. The Encoder outputs 100 pulses per revolution. Each revolution of the screw drive equals a .15 inch movement of the STOP. To calculate the scale factor simply divide 100 by .15 (100 ÷ .15) = 666.66 pulses per inch. This would be the scale factor if the display was to be read in inches.

In this application, the STOP movement must be accurate to .01 inches. Therefore the factor 666.66 must be divided by 100 (666.66 ÷ 100) = 6.6666 pulses per .01 inch. Enter 6.6666 for the scaling factor.

The unit has two alarm set points which activate two relays. The unit also has a programmable preset starting point. At any time the preset start point can be viewed or changed by pressing the view button. The two relay outputs can be used to signal alarms when the desired position has been reached.

The POSITROL is the perfect solution for position monitoring applications where a low cost, scalable monitor is needed.

SHIFT-TROL

Features

- Monitor Up to 4 Separate Shifts
- Separate 5 Digit Preset Counter
- 5 Digit Scaling Factors For Shifts and Preset Counter
- Pulse Input - 10 kHz Maximum
- EEPROM Memory Stores All Program & Data Values For 10 Yrs.
- 1/8 DIN Cutout
- NEMA 4X / IP65 Sealed Front Panel

Low Cost, Pulse Input Productivity Shift Monitor

Application:
Any piece-work application where several production shifts must be monitored. The Shift-trol shift monitor is especially useful in the Textile industry.

Description:
Featuring 6 digits of bright, 7-segment LED displays, the Shift-trol is a shift monitor which accepts signal inputs up to 10 kHz. The 5 digit dividing scale factors allow readouts in true engineering units. The unit has two, programmable alarm set points. These setpoints control two 5 Amp relays. A two stage panel lock prohibits menu changes from unauthorized personnel.

Specifications:

Display: 6 digit, .55" high, 7 segment, red orange, LED.

Input Power:
A) 110VAC ± 15% or 12 to 15VDC.
B) 220VAC ± 15% or 12 to 15VDC.
C) 24VAC ± 15% or 12 to 15VDC.
Current: maximum 300 mA DC or 8.0 VA at rated AC voltage.

Output Power: (AC powered units only)
+12VDC @ 50mA unregulated -10 +50%

Temperature:
Operating: +32°F (0°C) to +130°F (+54°C).
Storage: -40°F (-40°C) to +200°F (93°C).

Shift Counters: 5 digit display with a 5 digit dividing scale factor. The unit can monitor up to 4 separate shifts and can be ordered with a selectable fifth shift, grand total of shifts or a run time meter. Pressing the view button allows the operator to alternately view each shift, the preset counter, the ratemeter and the selected fifth shift, grand total or run time.

Input Signals:
4 to 30 VDC pulses (open or 0-1V low; 4-30V high).
MIN. ON/OFF PULSE WIDTH: (Pin 5)
High CPS: .05 msec. 10 kHz max.)
Low CPS: 12.5 msec. (40 Hz max.)

Preset Counter: 5 digit display with a 5 digit dividing scale factor. Two, 5 digit, programmable setpoints are available for output control. Display flashes when either output is active.

Ratemeter: Accurate to 4 1/2 digits. The ratemeter displays the RPM (rate per minute) of the raw input data.

Memory: EEPROM stores data for ten years if power is lost.

Reset:
Front Panel: resets displayed value and updates averaged rate to new sample.
Two Level Remote: 4-30VDC positive edge (Min. on: 12 msec.); 1. (Pin 9) Resets preset counter and control output only. 2. (Pin 6)-"Input B": Resets displayed value and updates averaged rate to new sample.

Lockout: Unauthorized front panel changes can be prevented by entering a user selected, 5 digit code. The lockout feature can be programmed to lock the entire front panel or lock the menu items and leave the presets and reset accessible. In either mode the shifts can be changed and the locked items can be viewed but not changed.

Serial Communications: RS232 or RS422 serial communication options are available. Up to 99 units can be networked to a computer and individually accessed. Information can be retrieved as well as sent to any single unit in the loop. A programmable print list is provided for strobed data transmission to printers and other peripheral devices.

Control Outputs:
2 each N.O. Relays - 5 Amp @ 120/240 VAC or 28 VDC. (N.C. Relay contacts or NPN sink from 10 VDC to .5 VDC @ 100 mA available with solder jumpers). The output will activate when the display is equal to or greater than the set point.

Shipping Weight: 2 pounds.

Approvals: CE Approved
TYPICAL APPLICATION:

NEED:
A company in the textile industry has a rib machine for which four shifts and machine run time must be monitored. To achieve optimum production, the monitoring system must also include the speed of the machine as well as a preset counter (doff counter). This system will be installed in several rib machines. The individual systems must be networked together allowing a host computer to access processing and data information.

SOLUTION:
The company purchased the Shift-trol (ST3A1) and the D08P proximity sensor. The prox. sensor was mounted to sense each rotation of the machines shaft. It takes 579 rotations of the shaft for one yard of material to be produced. Therefore the scaling factor for the shifts was set at 579. The preset counter (doff counter) is to read in tenths of hanks. Therefore the scaling factor for the preset counter was set at 27792 (579 x 48; "48 yards in a tenth of a hank"). The Shift-trols were ordered with RS232 communication and were linked to a host computer. Each Shift-trol was assigned a unique ID number so each work station can be individually addressed. All of the process and data information can be accessed and recorded by the host computer.

DIMENSIONS:

How To Order:
EXAMPLE: ST3A1

Series
ST0: 3 shifts, no scaling,
1 separate preset counter with 1 control output
ST1: 3 shifts, scaling,
1 separate preset counter with 1 control output
ST2: 3 shifts, scaling,
1 separate preset counter with 2 control outputs
ST3: 4 shifts, scaling,
1 separate preset counter with 2 control outputs,
1 separate RPM ratemeter of unscaled input data, selectable: Grand Total, 5th Shift or Run Time.
ST4: 3 shifts, scaling,
1 separate preset counter with 2 control outputs,
1 separate ratemeter with separate scaling, selectable: Grand Total, 4th Shift or Run Time.

Operating Voltage
A= 110 VAC ± 15% or 12 to 15 VDC
B= 220 VAC ± 15% or 12 to 15 VDC
C= 24 VAC ± 15% or 12 to 15 VDC

Options
1 = RS232 Communications
2 = RS422 Communications

Accessories
Separate non keyboard panel order #34235
Separate keyboard panel - order #34237
Preset Counters

Features
- Internal Battery Powered (8 years)
- Programmable N.O. or N.C. Relay Output
- Replaces Electro-Mechanical Units
- 6 Digit LCD Display
- Main & Lower LCD Displays Indicate Counter and Preset Values without External Power
- Add or Subtract Count Control
- Optically Isolated Count and Reset Inputs

Applications:
Batch counting and control, coil winding and wire cutting, length measurement, packing-line control, stop/start control and numerical position control.

Specifications:
Display: 2 lines of 6 digits, black on silver background. Main display .275" (7mm); indicates count value. Bottom display .157" (4mm); shows preset set point, "output on" and "low battery" indicators.
Preset Point: Single preset, user selectable: count up with output at preset (add), or count down with output at 0 (sub).
Reset: Manual, electrical and automatic. User selectable for reset to zero (add) or reset to the preset value (sub).
Inputs: (Count & Reset)
Count Speed: Max. 35 Hz (min. 14 mSec On/Off)
Reset: Edge Triggered, Minimum pulse 50 mSec
Optocoupled (STD) KAT-SP:
Low: Open or 2 to 2V
High: 12-250 VAC/VDC
Input Impedance: 100 kΩ
Switch Closure (Option S) KAT-SPS:
Low: 0 to 0.8V
High: Open or 2 to 5 VDC
Sink Current 5 mA, (DO NOT EXCEED 5 VDC)
Programming: Via six front-panel digit keys (one key assigned to each digit) and one front-panel reset key.
Output: Relay (N.O. or N.C.) self latching, contacts rated at 2A @ 30VDC, 0.5A @ 240VAC resistive load. In the manual reset mode (loop off), the output will remain latched until reset. In the auto-reset (loop on) mode the output will remain "on" for a user selectable time delay (100 to 500 msec.).
Batteries: Two internal, customer replaceable 3V lithium batteries provide power and data retention for up to 8 years (calculated at 5 x 10⁶ power operations @ 25°C).
Battery Monitor: Subsidiary display shows LO-BAT when batteries require replacement.
Noise Immunity: To VDE 843, Part 4, Severity 3
Temperature Range:
Operating: +14°F to +122°F (-10°C to +50°C)
Storage: -4°F to +140°F (-20°C to +60°C)
Protection: Front Panel is NEMA 4/IP65 sealed
Weight: Approx. 80 g
Approvals: CE Approved

Self Powered, Preset Counter
Replaces Electro-Mech. Counters

Operating The Counter:
Setting or Resetting
Press the red SET button or apply a pulse to the reset input to set the counter to zero (add) or the preset (sub).

Presetting
The preset is displayed on the lower line of the display. To set the preset, use the 6 keys assigned to the 6 digits. The unit must be reset to accept the new preset value.

Overflow and Underflow
In the adding mode the overflow is 999999 to 0; In the subtracting mode it is 0 to 999999. The output signal remains unaffected.

Lo-Bat Indicator
When the battery charge is too low, "Lo-bat" will appear on the lower line of the display and flash in 2 second intervals. When "Lo-bat" is indicated, the batteries should be replaced as soon as possible.

Changing the Batteries
Push the battery cover back and remove the batteries. Insert the replacement batteries making certain that the polarity is correct (observe "+" terminal on PCB).

Note: If the battery replacement takes longer than 7 minutes, the count, preset and program parameters will be lost. If this occurs, the unit will automatically enter the programming mode upon battery installation.
**Entering Programming Mode:**
Press the reset key together with the keys of decade 5 and 6 to enter the programming mode. On the lower line of the display the message "INIT" appears together with a down counter subtracting from 5 to 0 seconds. If the keys are released when the counter equals 5, the display will enter an LCD test. Releasing the keys at any time when the counter is greater than one, the display will return to the operating mode. If the keys are released after reaching zero, the programming mode will become active.

**Setting the Operational Parameters:**
Key 1 allows the user to choose requested functions within the parameters (i.e. add/subtract). Key 6 selects the displayed choice and advances to the next selection. After the last parameter "dp", the program jumps to the beginning. To exit the programming mode, the user must step through all the parameters (from beginning to end) with NO CHANGES at all.

**NOTE:** Whenever the programming mode is entered, the program jumps to the beginning, the previous parameters will be lost and the count and preset will be zeroed. If a battery change takes longer than 7 minutes, the display will automatically advance to the programming mode.

- **N7** - Explosion proof housing (see accessories section)
- **KATSP-BAT** Replacement Battery (2 required)
903K & 904K

Features
- 6 Digit Counter, Timer or Frequency Meter
- 2 Preset Values (Type 903K 1 Preset)
- Input Scaling (0.0001 to 9.9999) Multiplier
- 2-Line LCD Display
- Count & Preset Range of -999999 to 999999
- Add or Subtract Count Control
- AC or DC Operation
- Secondary Preset Batch Counter (904K)
- 24VDC to Power Peripherals

Applications:
- Preset batch counting, length measuring, simple positioning,
time control, speed control, rate control.

Description:
The 903K/904K Series is a LCD preset counter, timer or frequency meter. The following features are programmable:
- operating mode, polarity of inputs, input mode, multiplying factor, decimal point.
- output signals to be permanent or timed
- automatic reset
- gate time when programmed as a frequency meter
- timer resolution (s, min, h or h:min:s)

Inputs:
INP A, INP B
Count inputs. Max. count frequency 30 Hz or 1 kHz; separately selectable for both of these inputs.

Gate:
Level input; no counting while this input is activated.

Reset:
Edge triggered input; it is connected in parallel to the red reset key and sets the counter to zero (adding mode) or to the preset value (subtracting mode).

Key:
Level voltage input locks keypad.

Outputs:
- 2 potential-free outputs (Type 903: 1 output), versions with relay or optocoupler available.

Programming:
Types 903 and 904 are programmed by 4 front panel keys secured by a side dip switch. Easy setup is assured by selection of menu prompts on the display. The changing of presets by the front panel keys can be inhibited by external "Key" input.

Input Polarity:
Positive (PNP) or negative (NPN). The selected polarity applies to all inputs in common.

Operating modes, Impulse Counter and Timer:
- adding, starting at zero, manual or automatic reset
- subtracting, starting at the preset value (Type 903) respect. at preset value 2 (Type 904), manual or automatic reset.

Input modes, Impulse Counter and Frequency Meter:
- E1: 1 count input, 1 count direction input
- E2: 1 count input up, 1 count input down
- E3: quadrature input
- E4: quadrature input with pulse doubling

Decimal places:
The values may be displayed without, with one, two or three decimal places.

Scaling factor:
A scaling multiplier of 0.0001 ... 9.9999 may be programmed to display desired units of measure.

Output signal:
Selectable as a NO contact, NC contact, positive, negative, latched or timed (0.01 s to 99.99 s).

Gate time (Frequency Meter):
Selectable from 0.01 s to 99.99 s.

Hour Meter:
Timing in h, min or s, with a resolution of 0.001, 0.01, 0.1, 1.0 or h:min:s.
### Technical Data:

**Display:** 6 digit, 2-line, 7 segment LCD with sign

**Reset:** Type 904 two preset values

**Supply voltage:**
- 115 VAC, 230 VAC, 48 VAC or 24 VAC (tolerance ± 10%) or 11 ... 30 VDC

**Count inputs:**
- 2 count inputs,
- 4 input modes programmable.

**Input polarity:** programmable (PNP or NPN)

**Input resistance:**
- 10 kohm

**Max. count frequency:**
- 10 kHz (Switch selectable 30Hz or 10kHz)

**Min. pulse length of the control inputs:**
- 5 ms

**Input sensitivity:**
- Logic "0": 0 to 1 VDC
- Logic "1": 4 to 30 VDC

**Pulse shape:** variable (Schmitt Trigger characteristic)

**Output:**
- (Programmable output state)
- relay (250 V @ 3A)
- or optocoupler (30VDC/15mA @ 2V, 5mA @ 0.4V)

903: 1 output : SPDT

904: 2 outputs: R1 N.O., R2 SPDT

**Transmitter voltage:**
- 24 VDC, 80 mA
- 24 VDC, 60 mA for version with backlit LCD (optional)

**Data retention:** min. 10 years or 10⁶ memory cycles

**Noise immunity:**
- EN 50082 part 2
- EN 55011 class B

**Operating temperature:**
- 0...+50°C

**Housing:** 48 x 48 mm DIN

**Protection:** IP 65 (front)

---

### How To Order:

**EXAMPLE 904K A 0 A**

- **Series**
  - 903K = Single Output
  - 904K = Dual Outputs

- **Operating Voltage**
  - A = 115 VAC
  - B = 230 VAC
  - C = 11 to 30 VDC

- **Outputs**
  - 0 = Relay
  - 1 = Opto-Isolated collector and emitter

- **Options**
  - Blank if None
  - A = Backlit LCD Display (904K only)

* The wiring termination of pins 3 & 5 is correct here and on the unit termination label. Pins 3 & 5 may be reversed on some older datasheets.
Features

- 8 count modes
- Decimal point selection up to 0.000
- 8mm black character high contrast Starburst LCD display.
- Backlight
- 10-30VDC operation
- Maximum input frequency 500kHz (mode dependent)
- Up to Quad X 4 input
- Scaling multiply 0.000001 to 9.999999
- Scaling divide 0000001 to 99999999
- Up to 3 text characters per display
- CE approved

Description:
A Flexible device designed for many applications, it has 8 modes of operation for count and rate applications, with live scaling of the count and rate it is ideally suited to flow meter applications where the number of pulses per item are not easily defined or specified.

An 8 digit starburst display along with its various count and rate modes with text display makes this a unique product in the market place. Its features include backlight, EEPROM memory for data retention and scrolling display. Programmed through the front panel the KAL-D06 R/T is easy to set up and extremely flexible in its operation. Up to 3 characters can be programmed to appear on the display making it easier for the user to identify the units of measure.

Specifications:
- Supply Voltage: 13-30VDC, +/- 10%
- Current Consumption: 15mA, typical
- Display: 8 digit, 8mm height, high contrast Starburst LCD characters with leading zero blanking.
- Electronic Count Input: 500kHz maximum.
- Count Range: 0-99999999
- Panel Cut Out: 45mm x 22.5mm
- Front Panel Sealing: IP65 sealed when used with clip mount and gasket provided
- Reset Input (R): Reset using front panel button.
- Temperature Range:
  - Operating: 14 to 140°F (-10 to 60°C)
  - Storage: -4 to 140°F (-20 to 60°C)

Dimensions

Panel Cutout: 0.92" x 1.77" (22.5 x 45 mm)

How To Order:
KAL-D06 RT......................... 8 digit counter with ratemeter

Accessories
- N7 - Explosion proof housing (see accessories section)
- E200 - Outdoor Enclosure (see accessories section)
TR-545 Series

Totalizer and Ratemeter

Features
- Totalizer and Rate meter
- Separate scaling factor for counter and ratemeter
- Ratemeter displays frequency or RPM
- Simply press key to switch between counter and ratemeter
- Display range: 0 to 999999
- Screw terminal connections

Description:
The TR-545 is a totalizer and ratemeter. It accepts DC pulse inputs up to 20kHz. It is a perfect solution for all applications requiring the monitoring of rate and total.

Specifications:
Supply voltage: 10 to 30 V DC, with reverse polarity protection
90 to 260 V AC 50/60 Hz mains hum suppression
Power consumption: max. 2 W/6 VA
Display: 6-digit, red 7-segment LED’s height 14 mm
Data backup: EEPROM
Housing: housing for control panel 96 x 48 mm acc. to DIN 43 700; RAL 7021, dark grey
Polarity of Inputs: programmable, npn or pnp for all inputs
Input resistance: appr. 10 kΩ
Input frequency: 20 kHz, can be damped to 30 Hz
Reset time: 5 ms

Level of inputs:
DC-version
Low: 0 to 0.2 x UB [V DC]
High: 0.6 x UB to 30 V DC
AC-version
Low: 0 to 4 V DC
High: 12 to 30 V DC
DC Output: 24 V DC ±15 %/100 mA (AC powered units only)
Accuracy: Ratemeter: <0,1 %
Ambient temperature: −10 to +50°C
Storage temperature: −25 to +70°C
EMC: according to EC EMC directive 89/36/EWG
Interference emmisions: EN 50081-2/EN 55 011 class B
Interference resistance: EN 61000-6-2
Protection: NEMA4/IP65 (front panel)
Weight: appr. 150 g

MRT (MINITROL)

Features

- CSA Listed
- Separate Scaling Factors For A & B Inputs
- Display Rate & Total
- Pulse Input - 10 kHz Max.
- RS422/RS232 Serial Communication
- Modbus RTU RS422/RS485/RS232
- NEMA 4X / IP65 Front Panel
- Separate Add/Subtract Simultaneous Inputs
- Quadrature & U/D Direction Control Inputs

Application:
Any rate, total or blending application where 2 preset alarms and scaling are required.

Description:
The MINITROL is a 6 digit totalizer / ratemeter with two level, 5 digit preset alarm control of total or rate. Inputs A & B have separate scaling K-factors. The totalizer can be programmed for “A” subtract “B”, “A” add “B” or A & B as separate totalizers, with display and control of the “net” total and rate of “A”. The MINITROL is also available in 4 other versions. MC2: a two preset totalizer with scaling, MR2: a high/low alarm ratemeter with scaling; The “MC”: a totalizing counter only, and the “MR”: a rate meter display only. If only one input is required, the unit will display the total and rate from that one channel. The MINITROL can accept up to 10,000 pulses per second. It has a 5 digit floating decimal scale factor allowing total readout in true engineering units and rate per second, minute or hour. Input “A” simultaneously drives a ratemeter which can be programmed to display the basic frequency (rate per second) or factored to show rate per minute or rate per hour. Simply push the “VIEW” button to see either total or rate without losing a count. Two separate 5 A relay contacts can be set to operate at either rate or total presets in a latch or auto-recycle mode with output timing from 0.1 to 99.9 seconds.

Two control outputs can be assigned to either the totalizer or ratemeter and can automatically recycle at the batch or stay latched until reset.

Up to 99 units can communicate to a host computer on a single RS232 or RS422 loop.

When two inputs are received (A & B), the unit can either add or subtract the two inputs or display the two inputs as separate totalizers.

Low Cost, Pulse Input Totalizer/Ratemeter

- 30mV Magnetic Pickup Inputs
- 4-20mA or 0-20mA Analog Output

Specifications:
Display: 6 digit, 0.55” High LED
Input Power:
- 110 VAC ± 15% or 12 to 15 VDC
- 220 VAC ± 15% or 12 to 15 VDC
- 24VAC ± 15% or 12 to 15 VDC
Current: 250 mA DC max. or 6.5 VA AC
Output Power: (AC powered units only)
- +12 VDC @ 50 mA, unregulated -10 + 50%
Temperature:
Operating: +32°F (0°C) to +130°F (+54°C)
Storage: -40°F (-40°C) to +200°F (93°C)
Humidity: 0-90% Noncondensing
Memory: EEPROM stores data for 10 years if power is lost.
Inputs:
3: High Impedance DC pulse input 4-30 VDC (high), Open or 0-1 VDC (low), 10 KΩ imp. 10 kHz max. speed. Accepts simultaneous inputs. May be used with KEP 711 series or 715-1 encoders or PD & D series sensors.
3M: Mag. Input, Input A only, accepts 30mV input (50 V max. P/P) signals 10 KΩ imp. 5 kHz max. (Input B, 4-30V)
3MB: Mag. Input, Inputs A & B, accepts 30mV input (50 V max. P/P) signals 10 KΩ imp. 5 kHz max.
4: 4-30 V Count pulses on Input A, 4-30 V Direction Control input (level) on Input B. May be used with KEP 715-2 Encoder.
5M: 30 mA Count pulses on Input A (50 V max. P/P) 4-30 V Direction Control input (level) on Input B.
9: Quadrature, accepts 4-30 V pulses with 90° phase shift for direction detection. May be used with KEP 716 encoder.
9MB: Quadrature, accepts 30 mA (50 V max. P/P) pulses with 90° phase shift for direction detection.
Approvals: CSA File# LR91109-7, CE Compliant
Reset:
Front Panel:
    Resets displayed value and control output
Remote:
    4-30 VDC negative edge
    resets Totalizer "A" and control output
Control Outputs:
Relays:
    2 each N.O. Relay; 5 Amps 120/240 VAC or 28 VDC.
    (N.C. relay contacts and NPN transistor output
    available with solder jumpers. Transistor output is
    internally pulled up to 10 VDC through relay coil, sinks
    from 10 VDC to .5 V @ 100 mA)
Analog Output:
    An optional 4-20mA (0-20mA) output is available for
    the Minitrol series. The output can be programmed
    to track rate or total. This feature is available by
    adding suffix A to the part number. Connections are
    via a 2 terminal pluggable screw connector.
    Programming is accomplished by using the front panel
    in conjunction with rear dip switches.
Accuracy: ±.25% FS worst case.
Compliance Voltage: 3 to 30 VDC non inductive.
Scaling Factor (K-Factor): In the standard unit, a user
programmable K-Factor is used to convert the input pulses
to engineering units. The 5 digit K-Factor dividers, with
decimal keyed into any position, allow easy direct entry of
any K-Factor from 0.0001 to 99999. Separate factors may
be entered for the 2 separate input channels.
Presets: Two control outputs are provided. To set relay
values, press "menu" button until "Relay" appears on the
display, the A and B outputs can be assigned to the rate-
meter (high/low), one preset for rate and one for total, or
two presets on the A and B totalizers. A 5 digit value can
be entered for both presets and the decimal point location
is the same as the counter. The outputs can be set to en-
ergize from 0.1 to 99.9 seconds or latch (0.0). If a value
other than 0.0 is entered, the totalizers will auto reset at
the preset. In the A-B or A+B versions, the relays will be
assigned to either net total or A rate.
Lockout: Unauthorized front panel changes can be pre-
vented by entering a user selected 5 digit code in the "LOC"
mode. The front panel can be completely locked out or the
presets can remain accessible.

Ratemeter: Accuracy: 0.01% FS (±1 display digit).
The rate display updates once per second. The rate meter
can be programmed to accept almost any number of pulses
per unit of measurement, sample from 2 to 24 seconds
maximum, and auto-range up to 5 digits of significant infor-
mation. In the “RPS” mode, the rate meter displays in units
per second, and in the “scale” mode, units per hour or per
minute. The unit will display the rate of the A Input only.
Totalizer: The two 6-digit totalizers can count at 10 kHz
max. Each can have a 5-digit dividing scale factor. The to-
talizer advances on the positive edge of each pulse. Count
up or down modes available, as are quadrature inputs from
encoders for position or flow measurement. The unit can
be programmed to view the net value of "A+B" or "A-B", or
A and B as separate totalizers.
RS232/RS422 with KEP Protocol:
If the serial interface option is supplied, a number of units
can be linked together. (The terminal addressing the unit
must be capable of driving all loads in the loop.) Unit
status and new set points can be communicated by serial
communication. Mode changes, however, must always be
made on the front panel.
Data is received and transmitted over standard EIA RS232
or RS422 levels. Unit number, baud rate and parity are
entered in the “Program Setting” set up mode and remain
in memory even if power is off.

RS232/RS422/RS485 with Modbus RTU Protocol:
The serial port can be used for serial printing or also for
data acquisition. The unit can assign addresses up to 247
units (The terminal addressing the unit must be capable of
driving all loads in the loop.) The unit can communicate with
a master device through a Modbus-RTU protocol. The data
given for each parameter is in IEEE float format comprising
of 2 words. The unit can be connected in a network.
Device ID: 01-247
Baud Rates: 300, 600, 1200, 2400, 4800, 9600
Parity: None, Odd, Even
Protocol: Modbus RTU (Half Duplex)

Termination:

- 1- COMMON
- 2- N.O. (N.C./NPN)
- 3- COMMON

**Accessories**
- Separate non keyboard panel order #34235
- Separate keyboard panel - order #34237
**DRT (Dual rate/totalizer)**

**Features**
- Displays A, B, & C Rate & A, B, & C Total
- Separate Scaling Factors For A & B Inputs
- RS422/RS232 Serial Communication
- Modbus RTU RS422/RS485/RS232
- Pulse Input - 10 kHz Max.
- Security Lockout
- NEMA 4X/IP65 Front Panel
- 30mV Magnetic Pickup Inputs

**DESCRIPTION:**
The DRT (Dual Rate Totalizer) is a dual 5 digit Ratemeter 6 digit Totalizer in a 1/8 DIN package. User selects 1 of 6 displays to show A, B or C rate and A, B or C total. Inputs A and B have separate scaling to read in engineering units.

A 4-20mA (0-20mA) output of the C rate or total is optional. The user can press the VIEW button to see 6 separate items total A, total B, total C, rate A, rate B, rate C. Negative values are displayed with a negative symbol (-). The C value, the user can choose from the following combination of A&B inputs: TOTAL; with a choice of A+B or A-B; RATIO with choice of A+B(x100) to show percent of A to B quantity or A÷[(A+B)(x100)] to show percent of A to total quantity.

Two independent presets are standard. User selects whether output A is activated by total or rate value of input A or selected C. Output B can be activated by total or rate value of input B or selected C. Outputs activated by A or B total can be set to latch or autorecycle with an adjustable output duration from 00.1 to 99.9 sec. For rate, ratio, or C total outputs pull in when value is equal or above the preset and drop out when value is below the preset minus the selected 0 to 999 hysteresis.

**SPECIFICATIONS:**
**DISPLAY:**
6 digit, 0.55” High LED

**INPUT POWER:**
- 110 VAC ± 15% or 12 to 15 VDC
- 220 VAC ± 15% or 12 to 15 VDC
- 24 VAC ± 15% or 12 to 15 VDC

**CURRENT:**
250 mA DC max. or 6.5 VA AC

**OUTPUT POWER:** (AC powered units only)
+12 VDC @ 50 mA, unregulated -10 + 50%

**TEMPERATURE:**
- Operating: +32°F (0°C) to +130°F (+54°C)
- Storage: -40°F (-40°C) to +200°F (93°C)

**HUMIDITY:**
0-90% Noncondensing

**MEMORY:**
EEPROM stores data for 10 years if power is lost.

**INPUTS:**
3: High Impedance DC pulse input 4-30 VDC (high), Open or 0-1 VDC (low), 10 KΩ imp. 10 kHz max. speed. Accepts simultaneous inputs. May be used with KEP 711 series or PD & D series sensors.
3M: Mag. Input, Input A only, accepts 30mV input (50 V max. P/P) signals 10 KΩ imp. 5 kHz max. (Input B, 4-30V)
3MB: Mag. Input, Inputs A & B, accepts 30mV input (50 V max. P/P) signals 10 KΩ imp. 5 kHz max.

**RESET:**
Front Panel: Resets displayed value and control output
Remote: 4-30 VDC negative edge resets all counters, “A” counter or “B” counter (user selectable).

**K FACTOR/SCALING**
The DRT has two separate K-Factors that are used to convert the input pulses to engineering units. The 5 digit K-Factor dividers, with decimal keyed into any position, allow easy direct entry of any K-Factor from 0.0001 to 99999. Separate factors may be entered for the 2 separate input channels.

**CONTROL OUTPUTS:**
Relays:
- 2 each N.O. Relay; 10 Amps 120/240 VAC or 28 VDC. (N.C. relay contacts and NPN transistor output available with solder jumpers. Transistor output is internally pulled up to 10 VDC through relay coil, sinks from 10 VDC to .5 V @ 100 mA)

**Analog Output:**
An optional 4-20mA (0-20mA) output is available for the DRT. The output can be programmed to track rate or total of the C display. This feature is available by adding suffix A to the part number. Connections are via a 2 terminal pluggable screw connector. Programming is accomplished by using the front panel in conjunction with rear dip switches. Accuracy: 50uA worst case.

**Compliance Voltage:** 5 to 30 VDC non inductive.

**Approvals:** CSA File# LR91109-7, CE Approved
**PRESETS**
Two control outputs are provided. To set relay values, press “menu” button until “Relay” appears on the display, the A and B outputs can be assigned to the A, B or C displays. A 5 digit value can be entered for both presets and the decimal point location is the same as the counter. The outputs can be set to energize from 0.1 to 99.9 seconds or latch (0.0). If a value other than 0.0 is entered, the counters will auto reset at the preset (for A&B counters).

**LOCKOUT**
Unauthorized front panel changes can be prevented by entering a user selected 5 digit code. The front panel can be completely locked out or the presets can remain accessible.

**RATEMETER**
Accurate to 4 1/2 digits (±1 display digit). The ratemeter uses 1/tau with 8 digit math, can sample from 2 to 24 seconds maximum, and auto-range up to 5 digits of significant information. In the “RPS” mode, the ratemeter displays in units per second, and in the “scale” mode, units per hour or per minute. The unit will display the rate of the A&B Inputs.

**TOTALIZER**
The two 5-digit totalizers can count at 10Khz speed. Each has a separate 5-digit dividing scale factor. The totalizers advance on the positive edge of each pulse. Besides being able to step through the total and rate values of A & B inputs, the user can see a selected combination of total and rate of A+B, A-B, (A+B)X100 (percent of A to B), A+(A+B)X100 (percent of A to total). The unit can be programmed to view the Total/Rate value of “A+B” & “A-B”, or “A+B” & “A+(A+B)”.

**RS232/RS422 with KEP Protocol:**
If the serial interface option is supplied, multiple units can be linked together. (The terminal addressing the unit must be capable of driving all loads in the loop.) Unit status and new set points can be communicated by serial communication. Mode changes, however, must always be made on the front panel.

Data is received and transmitted over standard EIA RS232 or RS422 levels. Unit number, baud rate and parity are entered in the “Program Setting” setup mode and remain in memory even if power is off.

**RS232/RS422/RS485 with Modbus RTU Protocol:**
The serial port can be used for serial printing or also for data acquisition. The unit can address up to 247 units (The terminal addressing the unit must be capable of driving all loads in the loop.) The unit can communicate with a master device through a Modbus-RTU protocol. The data given for each parameter is in IEEE float format comprising of 2 words. The unit can be connected in a network.

**Ordering Information**
Example: DRT A 3 1
Series:  
DRT= 6 digits, counter / ratemeter with presets and scaling.

Operating Voltage:  
A= 110 VAC ± 15% or 12 to 15 VDC  
B= 220 VAC ± 15% or 12 to 15 VDC  
C= 24 VAC ± 15% or 12 to 15 VDC

Count Inputs:  
3 = Standard, 4-30 VDC simultaneous inputs.  
3M = Mag. Input, Input A only, 30mV input (Input B, 4-30V)  
3MB = Mag. Input, Inputs A & B, 30mV input

Options: (Multiple Options Not Available)  
A= Analog Output (4-20/0-20 mA)  
1= RS232 Communications  
2= RS422 Communications  
3= Modbus RTU RS232  
4= Modbus RTU RS422/RS485

Accessories:  
Separate non keyboard panel order #34235  
Separate keyboard panel - order #34234
**RTP**

**Two Separate Ratemeters, Totalizers With Two Line LCD Display**

**Features**
- Two pulse and three control inputs
- Displays: A Rate, A Total, B Rate, B Total, A+B Rate, A+B Total, A-B Rate, A-B Total, Grand Total
- Separate Scaling Factors For A & B Inputs
- Two relay outputs with LED Indication
- RS232/ RS485 port for serial communication and printing
- Security lockout
- 4-20 mA output (optional)

**Description:**
The RTP is a presettable Ratemeter and Totalizer from two pulse inputs. It can show rate and total at the same time on the 2 X 16 backlit LCD display. Both inputs can have up to 16 point linearizing k factors. The unit can be connected in a network for Data Acquisition.

**Specifications:**

**Input Power:**
- AC: 100 to 260 VAC; 6.5 VA
- DC: +24 VDC ; 250 mA max.

**Threshold:**
- High: 4-24 VDC; Low: < 1Vdc or open

**Input A:** Count Input, 5 kHz max.

**Input B:** Count Input, 5 kHz max.

**Input C:** Control Input

**Input D:** Control Input

**Input E:** Control Input (Not Used with RS485)

**Note:** AC powered units have isolated inputs. DC units share DC with input common.

**Output Power:** +20VDC @50 mA (unreg), +/- 15%

**Display:** 2 lines of 16 characters, backlit LCD

**Display Resolution:** 6 Digit Total, 6 Digit Rate

**Bezel:** NEMA 4/IP65 rated membrane keypad

**Indicators:** Two LED’s to indicate control output status.

**Memory:** NVRAM retains data on power failure

**Temperature:** Operating: 0 to 50 degrees C

**Humidity:** 10% to 90% (Non condensing)

**Size:** Bezel: 103mm X 55mm; Depth: 97mm

**Panel Cutout:** 92 mm X 45 mm (1/8 DIN size cutout)

**Immunity to ESD:** Level 3 per IEC1000-4-2

**Immunity to Transients:** Level 3 per IEC1000-4-4

**Radiated Susceptibility:** Level 3 per IEC1000-4-3

**Emissions:** EN55011 CISPR A

**Pulse Inputs**
The RTP can accept two pulse inputs (A&B). It computes rate and total of A, B, A+B and A-B. For both inputs the user can define up to 16 points of “k” factors. This allows linearization of the displayed rate, which is useful in improving the accuracy of the flowmeter.

The rate is computed within 300 ms per input. To stabilize the rate display, the user can select normalizing factor, which allows weighted average to be shown. Moreover, for rate displays, a time delay of up to 25 seconds can also be selected.

**Control Inputs**
The RTP has three Control Inputs, i.e. Input C, Input D and Input E (Only C & D with RS485 option). Each input can be configured to start/stop each counter or reset each counter and Control Output. These inputs can also perform different control actions like printing on serial port, lock unit and freeze display.

**Reset Options**
The entire unit, i.e. all counters and control outputs, or Counter A, Counter B, Counter A+B, Counter A-B, Control O/P A and Control O/P B can be individually programmed to be reset on pressing the front panel RST key and also by a positive edge signal to any of the Control I/Ps C, D and E.

**Serial Communication**
The serial strobed port can be used for serial printing of Total or Rate data with descriptors. The unit can also communicate with a master device through a Modbus-RTU protocol. The data given for each parameter is in IEEE float format comprising of 2 words. The unit can be connected in a network. Order Option 1 is RS-232 level format; Order Option 2 is RS-422/485 level format.

**Control Outputs**
The RTP has the following Control Outputs:

- RELAY / O.C.: 2 N.O. relays of 5 A and 250 V OR
- 2 Open Collector Outputs;
- 100 mA maximum.

**Features**
- Two pulse and three control inputs
- Displays: A Rate, A Total, B Rate, B Total, A+B Rate, A+B Total, A-B Rate, A-B Total, Grand Total
- Separate Scaling Factors For A & B Inputs
- Two relay outputs with LED Indication
- RS232/ RS485 port for serial communication and printing
- Security lockout
- 4-20 mA output (optional)

**Specifications**

**Input Power:** AC: 100 to 260 VAC; 6.5 VA
- DC: +24 VDC ; 250 mA max.

**Threshold:**
- High: 4-24 VDC; Low: < 1Vdc or open

**Input A:** Count Input, 5 kHz max.

**Input B:** Count Input, 5 kHz max.

**Input C:** Control Input

**Input D:** Control Input

**Input E:** Control Input (Not Used with RS485)

**Note:** AC powered units have isolated inputs. DC units share DC with input common.

**Output Power:** +20VDC @50 mA (unreg), +/- 15%

**Display:** 2 lines of 16 characters, backlit LCD

**Display Resolution:** 6 Digit Total, 6 Digit Rate

**Bezel:** NEMA 4/IP65 rated membrane keypad

**Indicators:** Two LED’s to indicate control output status.

**Memory:** NVRAM retains data on power failure

**Temperature:** Operating: 0 to 50 degrees C

**Humidity:** 10% to 90% (Non condensing)

**Size:** Bezel: 103mm X 55mm; Depth: 97mm

**Panel Cutout:** 92 mm X 45 mm (1/8 DIN size cutout)

**Immunity to ESD:** Level 3 per IEC1000-4-2

**Immunity to Transients:** Level 3 per IEC1000-4-4

**Radiated Susceptibility:** Level 3 per IEC1000-4-3

**Emissions:** EN55011 CISPR A

</tbody>
</table>

**ANALOG OUTPUT**
Type: 4-20 mA output.
Accuracy: ± 50 µA worst case.
This Analog O/P can be programmed to track any parameter. Reverse tracking O/P is also available.

**PRESETS**
The unit supports five counters, i.e. Counter A, Counter B, Counter A+B, Counter A-B and Grand Total. The counters can either be reset to zero or disabled. Relays can be activated by any of the Total or Rate values. If a Total preset activates the relay, the user can select an output duration of 0.1 to 99.9 seconds with instant auto reset to "0". A 00.0 duration keeps the relay activated until externally reset. If both presets are assigned to same counter, with Relay A duration set to 00.0 and Preset A lower than Preset B, Relay A pulls in at Preset A and drops out when Preset B (having a duration other than 00.0) pulls in. Counter recycles immediately, and Relay B stays activated for the selected duration.

If activated by rate, the relay pulls in at High Preset or above and remains on until rate falls below Low Preset.

**LOCKOUT**
The unit program and presets can be protected with a lock code to prevent unauthorized front panel changes. This code can be assigned with a maximum of 4 digits and is user selectable. It can be entered through front panel LOCK key or by configuring any of the Control I/Ps to "Lock unit". Alternate entry of the lock code or pulses to that I/P will lock or unlock the unit.

**Ordering Information**

Example: RTP A 3 1
Series: RTP= Pulse Input Ratemeter/Totalizer
Operating Voltage:
A = 110 VAC ± 15%
B = 220 VAC ± 15%
*C = 24 VDC
Input: 3= Standard, 4-30 VDC simultaneous inputs
Options:
1= RS-232. 3 Control Inputs (not available with RS-485)
*2= RS-485, 2 Control Inputs (not available with RS-232)
A = 4-20 mA Out (Can be ordered with options 1 or 2)
* Special Order
Accessories
NEMA 4X wall mount enclosure available, see NEMA-1/8DIN
XHV 7/4 Explosion Proof Housing available, see XHV7/4
Serial printer available, see P1000, P295
Ethernet Port Server available, see IEPS
RS-422/485 to RS-232 Communication Adaptor available, see CA285
**INTELLECT-69**

**Features**
- High/Low Scaling From Front Panel
- 2 Set Points Assignable To Rate Or Total
- Display Rate (pressure, level, watts, etc.), Peak & Valley and Integrated Total
- 0-5V, 0-10V, 1-5V, 4-20mA or 0-20mA Analog Input
- NEMA 4X/IP 65 Front Panel
- +24V Output For Peripherals
- RS422/232 Serial Communications

**Description:**
The Intellect-69 is an integrating totalizer/ratemeter which accepts analog signal inputs. The unit can be field programmed to accept 4-20mA, 0-20mA, 0-5V, 0-10V or 1-5V signals. An optional Square Law input is available for inputs that require square root extraction. A 4-20mA output option is available to control strip recorders or other peripherals. Two assignable set points are standard for two stage shut off. The high and low scaling settings are programmable from the front panel. By pressing the “view” button, the unit will display: integrated total, rate, peak or valley. Press the “lock” key once to freeze the display. RS422 or RS232 serial communications are available options for data communication with a host computer.

**Specifications:**
- **Display:** 6 digit, .55” high, 7 segment, red orange, LED.
- **Input Power:** 110, 220 VAC ± 15% or 12 to 24VDC.
- **Current:** max. 300 mA DC or 10.0 VA at rated AC voltage.
- **Output Power:** (AC powered units only) + 24VDC @ 50mA regulated ±5%
- **Temperature:** Operating: +41°F (5°C) to +130°F (+54°C). Storage: -40°F (-40°C) to +200°F (93°C).
- **Humidity:** 0-90% Noncondensing
- **Memory:** EEPROM stores data for 10 years if power is lost.
- **Reset:**
  - Front Panel: resets displayed values and control outputs.
  - Remote: 4-30VDC positive edge, resets totalizer and control outputs.
- **Input:** Standard: Linear 4-20mA, 0-20mA, 0-5V, 0-10V or 1-5V selectable from the front panel.
  - Optional: Square Law 4-20mA, 0-20mA, 0-5V, 0-10V or 1-5V is available for inputs that require square root extraction.
- **Input Impedance:** Current: 100Ω; Voltage: 115KΩ
- **Overvoltage Protection:** 50 V
- **Overcurrent Protection:** 50 mA
- **Resolution:** 14.5 Bits
- **Approvals:** CE Approved, CSA (File No. LR91109).
- **Calibration:** The unit does all of the calibrations internally. There are no potentiometers to adjust and the unit never needs to be removed from the case.

**Ratemeter / Totalizer From Analog Inputs**

**Features**
- 4-20mA Output
- Square Root Extraction

**Description:**
The unit can be ordered with an optional 4-20mA output which is proportional to the rate display. The high and low settings are programmable from the front panel. Set "low" greater than "high" for inverted output. A sinking driver generates a corresponding linear current through the external devices. The output updates with each update of the rate. Accuracy is ± 25% FS worst case. Compliance voltage must be 3 to 30 VDC non inductive. (The unit can provide the DC source as long as the drop across the devices being driven does not exceed 21V).
**Programming:** Decimal points, Scaling from 0 to 59999 units per selected time base, set points, input type, security lock code, and assigning outputs are all programmable from the front panel.

**Housing:** Standard 1/8 DIN, high impact ABS plastic case (NEMA 4X/IP65 front panel).

**Shipping Weight:** 2 lbs.

**Accuracy:**

- Separate keyboard panel - order #34234
PMT-555 Series

Features
• Large keys allow easy operation and programming
• Display Hold or reset input for the totalizer or for the limit values
• Key lock input
• Programmable 24 point linearization
• Integration function (totalizer) for the integration (sum calculation) of the measured values (e.g. throughput measurement => Fill-up level) with own scaling and programmable input threshold
• RS-232, RS-422, RS-485 Option
• Current or voltage input

Description:
The PMT-555 process monitor/totalizer is ideal for applications that require an LED process/totalizer display from voltage or current inputs. The unit can accept 4-20mA, 0-20mA, 0-10V, 2-10V or -10 - +10V signals. Two assignable set points are standard.

Specifications:
Supply voltage: 10 to 30 V DC, galvanically isolated with reverse polarity protection
90 to 260 V AC 50/60 Hz mains hum suppression
max. 2 W/6 VA

Power consumption: max. 2 W/6 VA

Display: 5-digit, red 7-segment LED's

Measuring rate: 1 measurement/second

Data backup: EEPROM

Housing: housing for control panel 96 x 48 mm acc. to DIN 43 700; RAL 7021, dark grey

Ambient temperature: -10 to +50°C

EMC: according to EC EMC directive 89/36/EEC

Interference emissions: EN 50081-2/EN 55 011 Class B

Interference resistance: EN 61000-6-2

Protection: IP65 (front)

Weight: app. 190 g

Current input: 0-20 mA, 4-20 mA

Voltage input: 0-10 V, 2-10 V, (-)10 - (+)10 V

Control inputs: High: 4-30 V DC
Low: 0-2 V DC

Resolution: 14 bits

Accuracy: < 0.1 % ±1 digit at 20 °C, automatic null balance

DC output: 10 V DC ± 2%, 30 mA (DC powered units)
10 V DC ±2%, 30 mA and 24 V DC ±15%, 50 mA (AC powered units)

Outputs: 2 Form C Relays
max. 300 V DC/250 V AC current: max. 3 A, min. 30 mA DC

**HK17**

**Features**
- Interchangeable with “Hobbs Minimeter”
- Low Cost
- 5 Hour Digits, .150” High, White on Black and Two Decimal Digits Red on Black
- Operation Indicator Wheel
- DC Accuracy = .05%
- Power Required = .2 Watt (DC), 2VA (AC)
- Temperature: -15°C to 50°C (5°F to 122°F)
- NEMA 4X/IP65 Sealed Front

**Applications:**
A high reliability instrument perfect for recording the operating time for maintenance, testing, leasing and warranty programs on all types of machinery.

**Description:**
Small in size and price, but rugged and durable, this AC or DC powered hour timer is driven by a synchronous motor. Many voltages are available. Four industry standard mounting styles are available. The unit is provided with easy connect, screw terminal connectors on .031” x .250” flat pins. This minimeter is especially designed for use on lighting systems, computers, business machines, control panels, generators, compressors and pumps. Useful also for service records on machinery such as industrial refrigerators, oxygen purifiers, printers or off-road vehicles.

**Specifications:**
- **Digit Size:** 0.150” x .067” (3.8 x 1.7 )
- **Display:**
  - Hours: white digits on black
  - Decimals: red digits on black
- **Voltages:**
  - 24, 110, 220 VAC ± 10% 50 or 60 Hz
  - 12 to 24, 36 to 80, 110 VDC ± 15%
- **Power Consumption:**
  - Approx 2 VA at 230 VAC
  - Approx. .2 Watts at 12 VDC
- **Termination:** Flat tabs .031 x .250” with screw terminal.
- **Reset:** None

**Drive:**
Synchronous motor with AC
Stepping motor with DC

**Operation Indicator:**
- AC: Fast rotating wheel with red stripes
- DC: 1/100 h-display rotates every 36 sec. by one number.

**Temperature:**
- -15°C to + 50°C (+5°F to + 122°F)

**Housing:**
NEMA 4X/IP65 front panel (gasket not supplied, RTV type sealer recommended), plastic case
**Weight:** 1.4 ounces (40 g)

**Approvals:** CE Approved, UL Listed; File# E128604

HK17.60
**HK07**

**Features**
- Super Low Power
- Hours & 1/100th Resolution
- 7 Digits with Magnifying Lens .16" (without magnifying lens .11")
- 7 Mounting Styles, Including PCB Mount Models
- Tiny Size
- Low Cost

**Applications:**
Printed circuit board warranty. Warranty monitoring where low power consumption is required, usually in battery-operated devices.

**Description:**
The HK Series hour meters use a quartz crystal oscillator that generates an impulse every 36 seconds or 0.01 of an hour. The coil is triggered for 32 ms. Max power consumption is needed only after every 36s. The rest of the time the power consumption is max. 2mA. This allows battery operation and use on electronic PC Boards. On times less than 36s are not counted. A very high shock resistance guarantees accurate timing under abnormal conditions.

**Specifications:**
- **PCB Mount Models:** silver-plated solder pins 0.016" x 0.047"
- **Display:** 99999.99 H
- **Digits:** Hours, white on black; Decimals, red on black
- **Rated voltage:** 5, 12, 24VDC ±10%
- **Residual ripple:** max. 5%
- **Average power consumption:** approx. 10 mW on 5VDC; approx. 24 mW on 12VDC; approx. 48 mW on 24VDC.
- **Max. power consumption:** every 36s with an impulse length of 32ms approx. 55mW on 5VDC; approx. 120 mW on 12VDC; approx. 250 mW on 24VDC
- **Ambient temperature:** +14° F to +185° F (-10°C to +85°C).
- **Solderable and wash proof versions:** HK 07.90, HK 07.91 and HK 07.92
- **Electric Connections on flush and base mount models:**
  - approx. 6" long wire leads (red + ); (black -)
  - **Accuracy:** .005%
  - **Approvals:** CE Approved

Low Cost Hour Meter

Features
- UL Listed, CE Certified
- Low Cost
- 7 Digit Display (99999.99 Hours)
- AC or DC Voltages
- Small Case

Description:
These meters are mainly used for monitoring the running time of machines, apparatus and instruments as well as for recording maintenance time, warranty time or rental use time. A synchronous motor operating through a gear train drives the number wheels for the display of full hours 1/10 h and 1/100 h. On AC-versions, the main supply (50 or 60 Hz) is used as frequency standard. On DC-versions the exact frequency generated by means of a quartz crystal. A rugged and completely insulated plastic housing provides substantial protection against environmental influences.

Specifications:
Termination: Flat tabs .031 x .250" with screw terminal
Voltages: 24, 110, 220, 440 VAC +15%, 50 Hz or 60Hz
12 to 24, 36 to 80, 110 VDC ± 10 %
Test Voltage: 2000V, 50 Hz
Ambient temperature:
-15° to +50°C on AC; -20° to +60°C on DC
Power Consumption:
Appr. 2 VA at 220 VAC; Appr. 180 mW at 12 VDC
Hour range:
AC Units: 99999.99 hours
DC Units: 999999.99 hours
Height of Figures: 4 mm
Color of Figures:
Hours: white on black, Decimals: red on black
Color of Housing: Black
Operation indicator: Fast rotating, white
Approvals: UL Listed: File # E128604X, CE Approved
Weight: AH57: 84g; H57 48g

How To Order:
EXAMPLE: H57 24VAC 60Hz

Series
H57 = Panel Mount
AH57 = Base Mount
H57.55 = Extended 2.16" x 2.16"
Bezel for 2" diameter cutout
H57.72 = Extended 2.83" x 2.83"
Bezel for 2" diameter cutout

How To Order:
EXAMPLE: H57 24VAC 60Hz

Voltages
12, 24, 36, 80, 110 VDC
24, 40,110, 220, 440 VAC

Frequency (AC units only)
50 or 60Hz (Specify)

Accessories
DR-4 = 4 DIN Rail (DIN 46277)
Features
• Dual 7 digit display w/characters magnified to .157” (4mm)
• Low Cost
• Isolation protection to VDEO435.
• AC or DC Voltages

Description:
This combination meter comprises a running time totalizer and an adding counter with a separate 7 digit display for each. In the standard version, the two meters are connected in parallel; the totalizer counts the number of pulses while the time meter totalizes the connect time. The time meter displays to hundredths of an hour (36 second intervals). A red visual indicator shows that the unit is operating. The unit is supplied with a clamp clip attachment for mounting and 2.16” x 2.16” (55mm) and 2.16” x 2.16” (72 x 72 mm) bezels are available as accessories. On AC models, the main supply (50 or 60 Hz) is used as the frequency standard. On DC models, the frequency is quartz crystal controlled.

Applications:
☛ Heating and utility system monitoring
☛ Machine run time monitoring and maintenance
☛ Refrigeration systems
☛ Water treatment equipment
☛ Compressors
☛ Industrial washing equipment

Specifications:
Termination: Flat tabs .031 x .250“ with screw terminal
Voltages: 24, 110, 220 VAC ±15%, 50 Hz or 60 Hz
12 to 24, 36 to 80, 110 VDC ± 10 %
Power Consumption:
Appr. 2.5 VA at 220 VAC; Appr. 220 mW at 12 VDC
Ambient temperature:
-15° to +50°C on AC; -20° to +60°C on DC
Environmental Protection: IP42, DIN 40 050 from front
Hour range: AC Units: 99999.99 hours
DC Units: 999999.99 hours
Count range: 9999999 counts
Display: Dual display with characters magnified to 0.157” (4mm) high.
Color of Figures:
White on black for hours, red on white for decimal hours
White on black for totalizing counter.
Color of Housing: Black
Operation indicator: Fast rotating, red
Weight: 2.3 Oz. (65g)
Approvals: CE Approved, UL Listed; File# E128604

How To Order:
EXAMPLE: HC77 24VAC 60Hz SC
Series
HC77 = Panel Mount
HC77.55 = Extended 2.16” x 2.16” Bezel for 2” diameter cutout
HC77.72 = Extended 2.83” x 2.83” Bezel for 2” diameter cutout
Voltages
12VDC (12 to 24 VDC)
36VDC (36 to 80 VDC)
110VDC (110 VDC ± 15%)
24V (AC Voltages ±10%)
110V (AC Voltages ±10%)
220V (AC Voltages ±10%)
Frequency (AC units only)
50 or 60Hz (Specify)
Options:
SC = Separate Connections
HC67
Combination Hour Meter & Totalizer

Features
- Dual 7 digit display w/characters magnified to 0.157" (4mm)
- Synchronous Motor Drive
- Isolation protection to VDEO435
- AC Voltages

Description:
This combination counter consists of a running time meter and an adding counter. These two meters are connected in parallel, the adding counter registering the total number of events and the time meter the total operating time of the device. Due to high shock resistance, a reliable count is guaranteed.

Applications:
- Heating and utility system monitoring
- Machine run time monitoring and maintenance
- Refrigeration systems
- Water treatment equipment
- Compressors
- Industrial washing equipment

Hour Meter:
Counting range: 99999.99 h
The coil of an impulse counter receives a drive pulse from a divider circuit every 36 seconds = 0.1h (quartz accuracy). On-times < 36 s are not counted.

Adding Counter: Counting range: 9999999 pulses.

Specifications:
- Termination: Flat tabs .031 x .250"
- Voltages: 110, 220 VAC ±10%, 50 Hz or 60 Hz
- Power Consumption: Appr. 1.7 VA at 220 VAC
- Operating temperature: +14° to 140° F (-10° to +60°C)
- Environmental Protection: IP51 (front side in built-in state)
- Count range: 99999.99 hours; 9999999 counts
- Display: Dual 7 digit display with characters magnified to 0.157" (4mm) high.
- Color of Figures:
  White on black for hours, red on white for decimal hours
  White on black for totaling counter.
- Color of Housing: Black
- Weight: 2.3 Oz. (65g)
- Approvals: CE Approved

How To Order:
EXAMPLE: HC67 110VAC 60Hz

Series
HC67

Voltages
110V (AC Voltages ±10%)
220V (AC Voltages ±10%)

Frequency
50 or 60Hz (Specify)
M Series

Features

- All Standard Voltages
- Electric, Manual, or Non-Reset Available
- Varied Resolutions Available
- Varied Mounting Styles
- Many Options Available

Description:
The M Series hours, minutes and seconds timer offers more voltages, reset options and more resolutions than any other electromechanical timer made today. Driven by a solid state circuit, with control line input that insures .05% accuracy, these timers provide instrument level performance.

Specifications:
Display: 5 or 6 digit with reset 5 or 8 digit without reset
Digit: .160" high (each time designation has color-coded wheels for easy display)
Operating Voltage: 6, 12, 24, 48, 110VDC; 12, 24, 110, 220VAC
Accuracy: AC-based on line frequency, DC-crystal oscillator rated at .05% accuracy
Power Consumption: 2.5 W typ., 9 W required for reset
Supply Voltage: ±10% of rated voltage
Supply Ripple: 10% maximum (DC units only)
Temperature: +32° F to +112° F (0° C to +45°C) operating

Mounting:

How To Order

EXAMPLE: MTH 16. 1 1 12VDC V

Series
AC with Reset:
MTH16. (Hours 1/100)
MTM15. (Minutes 1/10)
MTS16. (Seconds only)
MTHMS16. (Hrs, Min, Sec)
MTHM15. (Hrs, Min 1/10)

AC without Reset:
MTH18. (Hours 1/100)
MTM17. (Minutes 1/10)
MTS18. (Seconds only)
MTHMS16. (Hrs, Min, Sec)
MTHM15. (Hrs, Min 1/10)

DC with Reset:
MLTH15. (Hours 1/100)
MLTM15. (Minutes 1/10)
MLTS16. (Seconds only)
MLTHMS16. (Hrs, Min, Sec)
MLTHM15. (Hrs, Min 1/10)

DC without Reset:
MLTH17. (Hours 1/100)
MLTM17. (Minutes 1/10)
MLTS18. (Seconds only)
MLTHMS16. (Hrs, Min, Sec)
MLTHM15. (Hrs, Min 1/10)

Mounting:
1 = Screw panel
2 = Spring clip
0 = Rear Mount (for F1K1 Option Only)

Reset:
0 = Non-reset
1 = Manual
2 = Electric
3 = Manual and electric

Voltage (specify):
DC - 6, 12, 24, 48, 100
AC - 12, 24, 110, 220

Available Options:
TB - terminal block
V - manual reset guard
US - spade key reset
ML - magnifying lens
HT - extended temperature (+32°F to +140°F)
F1 - screw panel mount frame w/ socket box (cutout W2.15" x H1.20")
F1DK - transparent polycarbonate cover, keylock, tamper-proof.
F1DV - transparent polycarbonate cover, knob closure
F1K1 - silicone cover, 0 mount style

Enclosures:
N7 - explosion proof
N4 - weatherproof
N12 - dust and oil tight

Description:
The M Series hours, minutes and seconds timer offers more voltages, reset options and more resolutions than any other electromechanical timer made today. Driven by a solid state circuit, with control line input that insures .05% accuracy, these timers provide instrument level performance.
**HB26 Series**

**Features**
- REPLACES HB16 SERIES
- Operation Indicator: Fast Rotating Gear Wheel
- Driven By A Synchronous Motor
- Wide Variety Of Operating Voltages
- Small Size
- Long Life
- Low Cost

**Applications:**
- Engine Hour Meters
- Rental Equipment
- Maintenance Timer

**Description:**
This 6 digit hour meter is the perfect timer when low cost, small size and high quality are important. It is available in AC or DC voltages with manual reset. Highly visible white on black hour digits including red on black decimal digits. Unit is also pluggable into socket box 945.2.

**Specifications:**
- **Color of Housing:** Black
- **Digits:** 6, 0.177” (4.5mm) high
- **Display:** 9999.99h for AC models, 99999.9h for DC models
- **Hours:** white figures on black
- **Decimal digits:** red figures on black
- **Reset:** Manual reset
- **Operating Voltages:**
  - 24, 115, 230 VAC, +/- 10% 50/60 Hz
  - 12-24, 36-80, 115 VDC +/-15%
- **Termination:** Wire leads .078" x .019" (2mm x .5mm²) NYFAZ 19.685" long (.5m)
- **Temperature:** 14°F to 122°F (-10°C to 50°C)
- **Power Consumption:** Appr. 2 VA at 230 VAC, Appr. 80mW at 12 VDC, Appr. 270mW at 24 VDC
- **Weight:** 2.116 ounces (60 grams)
- **Protection:** IP 42 front side, sealing cover K1: IP 54 front side, Transparent cover Dv and Dvs: IP 55 front side
- **Approvals:** CE Approved

**Options:**
- Spade Key Reset (US, Secret Reset (SR))
- Flexible sealing cover: K1
- Flat pins .031" x .110" (.8mm x 2.8mm)
  - with push-on connectors
- Flat pins .031" x .248" (.8mm x 6.3mm)
  - without push-on connectors

**Accessories:**
- Socket box: 945.2
- Flexible sealing cover: K1 black
- Front bezels: F1 black
- Dummy housing .984 x 1.968 (25 x 50mm) grey, black

**How To Order:**
**EXAMPLE:** HB26 1 1 110VAC 60HZ

- **Series**
  - 6 digit hour meter
- **Mounting**
  - 0 = Non flange
  - 1 = Screw panel mount
  - 2 = Spring clip
  - 3 = Large screw panel
- **Reset**
  - 0 = none
  - 1 = panel reset
- **Voltage**
  - 24, 115, 230 VAC (+/-15%)
  - 12-24, 36-80, 115 VDC (+/-15%)
- **Frequency** (AC only)
  - 50 or 60 Hz
- **Available Options** (add to end of part number)
  - K1 - Silicone cover #3 mount style
  - F1 - Frame - with socket box 945.2
    - 0 Mount only
  - 945.2 - Socket box
  - F1DVS - Frame with locking cover & 945.2 socket box
  - F1DK - Frame with knob closure cover & 945.2 socket box
  - FL - 6” (253mm) Wire Leads
  - US - Spade Key Reset
  - TB - Terminal Block
  - SR - Secret Reset

*NOTE: The HB26 replaces the HB16*

**H37 Series**

**Hour Run Meter**

**Features**
- Operation Indicator: Fast Rotating Gear Wheel
- Driven By A Synchronous Motor
- Wide Variety Of Operating Voltages
- Less Than 2” Deep

**Description:**
This hour meter is the perfect timer when low cost, small size and high quality are important. It is available in 7 digits without reset. Engine hour meters, rental equipment, maintenance timer and telephone usage are a few of the applications using this timer.

**Specifications:**
- **Color of Housing:** Black
- **Digits:** .160” high
- **Display:** 99999.99 (7 digits) AC Units
  999999.99 (8 digits) DC Units
- **Decimal digits:** red figures on black
- **Hours:** white figures on black
- **Drive:** synchronous motor for AC units
  stepping motor for DC units
- **Resolution:** Hours & 1/100ths.
- **Reset:** non-reset
- **Operating Voltages:**
  - DC: 12-24, 36-80, 110 ± 15%
  - AC: 24, 110, 220 ± 15%
- **Accuracy:** .05%
- **Termination:** Flat tabs .031 x .250” with screw terminal
- **Temperature:** + 5°F (-15°C) to + 122°F (50°C)
- **Power Consumption:**
  - on 24 and 110 VAC approx. 1.5 VA
  - on 220 VAC approx. 2 VA.
  - on 12 VDC approx. 85 mW.
  - on 24 VDC approx. 170 mW.
- **Approvals:** CE Approved

**How To Order**

**EXAMPLE:** H37 2 0 110VAC 60HZ

| Voltage | 12-24, 36-80, 110 VDC (±15%)  
  24, 110, 220 VAC (±15%) |
| Frequency (AC only) | 50 or 60 Hz |

NOTE: The H37 replaces the HB17
**Features**

- 8 Digits Standard
- Meets NEMA 4X and IP65 Ratings
- Long Life (10 Year) Lithium Battery
- Screw Terminal Block
- Electronic or Contact Closure Input
- Electronic Input for Sinking Inputs from a Max. of 18VDC Without Module
- High Voltage Input (optional): 10 to 240 V AC; 10 to 110V DC
- UL Listed

**Description:**

The KAL-DTIME timers are small, lithium battery powered, timers that are panel mounted. The timers are designed as replacements for standard electro-mechanical timers. They use the latest custom CMOS technology and incorporate an 8 digit, 0.354" (9mm) high, LCD display.

It operates from a long life lithium battery (life 10 years) and can be operated from contact closure or electronic devices. No separate alkaline batteries are required. The front reset button can be disabled if desired.

**Specifications:**

**Battery:** Non-replaceable Lithium battery, expected life of 10 years at 20°C

**Display:** 8 digit black LCD, Digit size 0.354" (9mm) high, leading zero blanking.

**Backlight:** backlight requires external 5V supply (±0.5V @ 20mA). 12V, 24V and 30V can be used with the use of an external resistor, see backlight wiring diagram for details and resistor values.

**Reset:** Panel or remote (can be disabled if desired)

**Time Range:**

- SECONDS: 99999999
- MINUTES and SECONDS: 99999-59
- HOURS and 1/100ths: 99999-99
- HOURS and MINUTES: 99999-59

**Temperature Range:**

- Operating: 14 to 140°F (-10 to 60°C)
- Storage: -4 to 140°F (-20 to 60°C)

**Battery Life:** 10 years at 20°C (calculated)

**Relative Humidity:** 80% max. up to 31°C, decreasing to 50% max. at 40°C

**Connection:** Finger-proof screw terminal for wires up to 0.062" (1.5mm²)

**Sealing:** NEMA 4X/IP65; Remove film from self adhesive gasket before use! Overvoltage Category II, Pollution Fegree 2 (IEC 64)

**Certifications:** UL Listed

**KAL-DTIME Wiring:**

1 - Timing Input
2 - Not Used
3 - External Reset Input
4 - Direction Input
5 - External Power for Backlight
6 - 0V, Common

**Timing Input:**

- Sink input NPN
- $R = Internal \text{ resistor } 3.3\text{MΩ}$
- Max 18V, threshold 1V
- Negative edge trigger
- Seconds, Minutes-Seconds
  - T = Minimum 1 second
- Hours 1/110, Hours-Minutes
  - T = Minimum 6 seconds

**External Reset Input:**

- Sink input NPN or contact closure
- $R = Internal \text{ resistor } 3.3\text{MΩ}$
- Max 18V, threshold 1V
- Negative edge trigger
- Min. 15mS

**Direction Input:**

- Sink input NPN or contact closure
- $R = Internal \text{ resistor } 3.3\text{MΩ}$
- UP: Not connected or >2V (logic 1), max 18V
- DOWN: Connected to common or <1V (logic 0)
- Direction signal must change >5µS before Count signal.

How To Order:
- KAL-DTIME............... 8 digit timer with 10 yr battery
- KAL-DTIMEAC/DC ........ 8 digit timer with 10 yr battery
  with High Voltage Input

Accessories
- N7 - Explosion proof housing (see accessories section)
- E200 - Outdoor Enclosure (see accessories section)
134K-135K

Features
• Low price and high efficiency
• Large (8 mm) 8-digit LCD display,
• Optional backlighting
• Different time ranges from 0.1 second to 100,000 hours
• 0.1 second synchronization makes it suitable for very short activation times
• High voltage input for 10 to 260 V AC/DC voltage pulses
• Very high accuracy: 100 ppm
• NEMA4/IP65 Front Panel
• Screw terminals, RM 5 mm

Battery Powered Hour Meters with LCD Display

- Lifetime of the battery approximately 8 years
- Locking of the reset key
- Operating temperature –10 to +60 °C

Technical data

Power supply: non-replaceable lithium battery (lifetime approximately 8 years at 20°C)
Backlighting: external electrical source 24 V DC +/-20%, 50 mA
Display: LCD, 8 decades, 8 mm high characters
Display range: –99999999 to 99999999, with overflow display
Reset: manual and electrical
Timing inputs:
A. Standard DC Input (max. 30 V DC)
   NPN or PNP
   Switching level:
   NPN: Low: 0 to 0.7 V, High: 3 to 30 V DC
   PNP: Low: 0 to 0.7 V, High: 4 to 30 V DC
B. High Voltage Input (10 to 260 V DC/AC)
   Timing input: Optocoupler input, max. 30 Hz
   Min. pulse time: 16 ms
   Switching level: Low: 0 to 2 V DC/AC, High: 10 to 260 V DC/AC
C. Timing range switching (Mode)
   Time Range: see order table
   Contact input:
   Open Collector NPN (switching at 0 V DC)
   Switching level:
   NPN: Low: 0 to 0.7 V, High: 3 to 5 V DC
D. Reset Input (only DC and high voltage)
   Minimum pulse time:
   DC: 50 ms, high voltage: 16 ms
   Contact input DC*:
   NPN: Low: 0 to 0.7 V, High: 3 to 30 V DC
   High voltage input: 10 to 260 V DC/AC
E. Electrical reset key locking (for DC and AC)
   Input not active: Reset key locked
   Contact input:
   Open Collector NPN (switching at 0 V)
   Switching level:
   NPN: Low: 0 to 0.7 V, High: 3 to 5 V DC
Interference emissions:
EN 55011 Class B, EN 61000-6-2 EN 61010 Section 1 (only AC versions)
Housing: dark grey RAL 7021
Operating temperature:
–10 to +55 °C
Ambient temperature:
–10 to +60 °C
Storage temperature:
–20 to +70 °C
Protection: NEMA4/IP65 front
Weight: approximately 50 g

Accessories
N7 - Explosion proof housing (see accessories section)
E200 - Outdoor Enclosure (see accessories section)
**K198**

**Features**

- Suitable for portable devices, vending and gaming machines, printers and copiers
- Recording of running time, outage times, set up times
- Non-volatile memory (no battery)
- Wide temperature range and wide voltage supply range
- Very high reliability
- Small size and low cost

**Specifications**

**Supply**

- 8 ... 28 V DC with reverse polarity protection

**Current consumption**

- 3 mA maximum at 8 ... 24 V DC
- 10 mA at 28 V DC

**Start and reset input**

- 8 ... 28 V DC

**Display**

- 6-digit display, figure height 8 mm

**Data backup**

- EEPROM

**Housing**

- Dimension 15 x 33 mm
- Color: black

**Operating temperature**

- –40 ... +85 °C

**Humidity**

- 95 % RH +32 °C for 2 hours

**EMC:**

- according to EC EMC directive 89/36/EWG
- Interference emission: EN 50081-2/EN 55 011 Class B
- Interference resistance: EN 6100-6-2
- Weight: approximately 8 g
- Memory capacity: CMOS EEPROM. Nonvolatile memory has data retention in excess of 10 years without power.
- Protection from: inductive swiching, alternator load dump

**Dimensions**

- Low operating current
- Very high shock and vibration resistance

**Wiring**

**Ordering Information**

K198 = LCD PCB Mount Hour Meter
Presets Hour Meter

**Features**
- Rugged Case
- Varied Mounting Styles
- Manual Reset
- 5 Amp Switch
- Times Up to Preset
- Preset Displayed Permanently

**Application:**
Perfect adding preset timer for chemical processes, electroplating baths, controlling periods of time, and endurance tests.

**Description:**
Dual display 5 digit, preset. These units feature two registers, one for the set point, one for the actual time. Change setpoint during a run with front panel buttons. Manual reset on front panel. Upon reaching preset, a 5 amp Form C switch trips. The timer continues timing to register actual time elapsed. Panel or spring clip mount; accepts most voltages AC/DC; keylock transparent cover available.

**Specifications:**
- **Display:** 4 hour digits-white on black, 1 decimal digit-red on black.
- **Digits:** Preset (.157’’), counting (.197’’)
- **Resolutions:** Hours 1/10
- **Operating Voltages:** 12, 24, 48VDC; 24, 48, 110, 220VAC.
- **Power Consumptions:** 1.5W, DC; 2.2 VA, AC.
- **Switching:** 5 amp Form C transfers at preset.
- **Switch Rating:** AC load max. 250V 5A DC load max 12V 3A; 24V 2A.
- Arc suppression recommended for inductive load.
- **Temperature:** (-10°C to +50°C) +12°F to ±122°F.
- **Weight:** 5 oz.; including frame, 7 oz.
- **Approvals:** CE Approved

How To Order:

EXAMPLE: HVA15 1 1 110VAC 60Hz

Series

Mounting

0 = Rear stud mount

1 = Screw panel

2 = Spring clip

3 = Large screw panel

Reset

1 = Manual push button

Voltages (specify)

12, 24, 48 VDC

24, 48, 110 and 220 VAC

Frequency (AC only)

50 or 60 Hz

Available Options (add to end of part number)

K2 - Silicon cover

F2 - Frame w/ Socket Box

F2DVS - Frame w/ locking cover & Socket Box

F2DV- Frame w/ knob cover & Socket Box

US - Key reset

DVS - Locking cover without Frame

DV - Knob cover without Frame

N7 - Explosion proof housing (see accessories section)
DT20 Series

Features
- 24 Hour (AM & PM), 7 Day Programming
- 20 Programs Provide Up To 10 ON & 10 OFF Events Per Day / Week
- Rechargeable Battery Backup With 100 Hour Carry-Over
- 16 Amp, SPDT Relay
- Manual Override
- Several Mounting Styles Available

The DT20 is a compact electronic 24 hour/7 day time switch module, with heavy duty relay contacts for switching low or line voltage loads. Applicable for time of day control of pumps, fans, heaters, HVAC control circuits, lighting, machinery and many other types of commercial, industrial, and agricultural equipment.

All models feature large keys with unique “circular programming” for easy programming, a large LCD display and battery backup.

TECHNICAL DATA:
- Channels: 1
- Programs: 20
- Manual 3 way override: On-Auto-Off
- Shortest switching time: 1 minute
- Reserve carryover: 100 Hours
- Input voltage: 24VAC/DC
  120VAC
  208/240VAC
- Switching output: SPDT relay
- Switch ratings: 16A @ 277VAC 25ma, 40VDC
  1000W Tungsten @ 250VAC
  500W @ 125VAC
- Input draw: 4VA
- Input frequency: 50 or 60Hz
- Wiring connections: 1/4” quick connects
- Ambient temperature: -20° F to 140° F (-28° C to 60° C)
- Approvals: UL and Canadian UL recognized: File E83486

MOUNTING OPTIONS:
The standard DT20 models may be surface mounted inside a panel or flush mounted with DTA-PH Base mounting kit, available from KEP. Indoor NEMA 1 (DTA-E150), and outdoor NEMA 3R (DTA-E200) enclosures are available for stand-alone mounting.

CAUTION!
RISK OF ELECTRIC SHOCK
Turn power off at main panel before servicing the DT42 or the equipment it controls.
**DT20 Day Timer**

**How To Order:**

Example: DT20 A

Series:

- DT20 = Day Timer

Operating Voltage:

- A = 110 VAC
- B = 220 VAC
- C = 24 V AC/DC

**Mounting Accessories**

- DTA-PH = Panel Housing for Panel Mount
- DTA-CC = Clear Cover for Panel Housing (DTA-PH)
- DTA-B = Base with Screw Terminal (not for panel mounting)
- DTA-TC = Terminal Cover for DTA-B
- DTA-E150 = Indoor Enclosure
- DTA-E200 = Outdoor Enclosure

**Additional Mounting Options:**

- DTA-PH
- DTA-E150 & DTA-E200
- DTA-B

**Panel Cutout**

- Panel Cutout: 2.62 (66.5) x 2.62 (66.5)
- Max. Panel Thickness: 0.2 (5)

**Dimensions**

- DTA-PH
- DTA-E150 & DTA-E200
- DTA-B

# TR-910

## Programmable Time Relay with LCD Display

### Features
- Easy Operating and Programming Using Front Keypad
- Self Powered with Internal Replaceable Lithium Battery
- High Contrast, 2-line, 5-digit, LCD-Display
- 9 Programmable Time Ranges from 0.20 Seconds up to 99999 Hours
- Relay Contacts Rated at 8A; Programmable to NO or NC
- Resolution up to 0.01 Seconds
- Universal Inputs for 12 - 260 V AC/DC
- 8 Timing Modes
- 3 Programmable Activation Modes
- NEMA4/IP 65 Front Panel
- Plug-in Connector

Timing Modes

Dimensions

Terminal Connections

Order Code:
Model Number: TR910.010.800
**INT62A**

**Features**
- 6 Large, LED Digits
- Contact Closure, 3 to 30 Volt DC Start/Stop Pulse
- AC or DC Power
- Remote & Front Panel Reset
- Screw Terminal Connection
- NEMA 4X / IP65 Front Panel

**Applications:**
Ideal for elapsed time indication applications where a large LED display is required. Equipment or machinery downtime indicator/on-time indicator.

**Description:**
The INT62A is a low cost, highly accurate 6 digit timer. The large, brilliant .6" red-orange LED’s show the elapsed time. If there is a failure of the AC or DC power source, an internal memory system will retain all of the important information for at least ten years without any battery. The unit is housed in a NEMA 4X/IP65 front, DIN standard panel mount enclosure. See “Timer Switch Settings” section for “Time Base” ranges. The keypad is used to divide the “Time Base” from 1 to 100, change the decimal point, key-in preset times and reset the timer.

**Specifications:**

**Mounting:**
Standard DIN cut-out. 3.622" (92mm) wide, 1.772" (45mm) high, 4.4" (111.8mm) max depth behind panel.

**Display:**
6 digit, 0.55" High LED

**Power Supply:**
110 VAC 50/60 Hz., 220 VAC 50/60 Hz., 12 VDC - 10% to 24 VDC + 10%.

**Accuracy:**
Over full temperature range, an accuracy of 0.05% is obtained by the use of an internal crystal time base oscillator.

**+ 5 Volt DC Output:**
Up to 100mA of + 5 Volt regulated power is available to supply peripheral devices.

**Power Consumption:**
Less than 425mA required for DC operation with all options. Less than 260mA without BCD output option. AC power consumption less than 5 watts with all options.

**Standby System:**
Internal non-volatile RAM (EEPROM) retains counts for at least ten years without power.

**Housing:**
Standard high impact UL94V-O rated plastic case.

**Temperature:**
Operating + 32 °F (0°C) to + 130 °F (+ 54°C). Storage -40°F (-40°C) to + 200°F (+ 93°C).

**Signal input:**
3 to 30 Volt DC pulses of .5 ms. minimum duration.

**BCD Output:**
Parallel TTL 5VDC compatible positive true logic four lines per digit. Six full digits of data.

**TIMER SWITCH SETTINGS:**
Remove front bezel revealing DIP switches (see figure below). Set the switches to the desired function according to the programming instructions following: (OFF is up, ON is down)

<table>

**Preset Timer with LED Display & BCD Output Option**
**Terminal Designations:**

- **Mounting:**
  - 3.925 (99.7)
  - 4.437 (112.7)
  - 2.625 (66.68)

**IMPORTANT:**
Terminal #8 must be connected to earth ground at all times when in use. This provides a ground path for static electricity which otherwise would cause faulty operation, erroneous data or circuit damage.

**BCD Option Terminal Designations:**

**Accessories**
- Non keyboard panel separate: Model 34235
- Keyboard panel Model 34236
531 Series

Features:
- Compact and Low-Cost Temperature Display
- Temperature Display in °C or °F
- MIN/MAX Value Retention
- EEPROM Data Backup on Power Failure
- Galvanic Isolation with Reverse Polarity Protection
- Screw Terminal Connectors: pitch 5 mm
- Display Hold Input

Specifications:
- Supply voltage: 10-30 V DC, galvanically isolated with reverse polarity protection
- Current draw: max. 40 mA
- Display: 5-digit display, red LED's; height 8 mm
- Measuring rate: 1-2 times per second
- Data backup: EEPROM
- Housing: housing for control panel 48 x 24 mm acc. to DIN 43 700; RAL 7021, dark grey
- Ambient temp.: –20 to +65 °C
- EMC: according to EC EMC directive 89/36/EEC
- Interference emissions: EN 50081-2/EN 55 011 Class B
- Interference resistance: EN 61000-6-2
- Protection: NEMA4 / IP65 (front)
- Weight: app. 50 g
- Circuit type: 2-wire, 3-wire and 4-wire connection technique, programmable
- Input: Pt100 or Ni100 RTD with sensor breakage monitoring

Control inputs: High: 4-30 V DC, Low: 0-2 V DC
Supply current: 1 mA
Supply line: 2-wire: max 20 Ω, programmable 3-wire, 4-wire: max 20 Ω, no balancing required
Temp. ranges: Pt100 acc. to DIN IEC 751:
- –199.9 °C to +850.0 °C
- –327.8 °F to +1562.0 °F
Ni100 acc. to DIN 43760:
- –60.0 °C to +250.0 °C
- –76.0 °F ... +482.0 °F
Resolution: 0.1°C (0.1°F) or 1°C (1°F)
Linearity error: Pt100 < 0.1 % for entire measuring range at an ambient temperature of 20 °C
Ni100 < 0.2 % for entire measuring range at an ambient temperature of 20 °C
Temp. drift: 0.1 K/KAmbient

Order #: 531 = Temperature Display with RTD Input

Accessories:
- N7 - Explosion proof housing (see accessories section)
- E200 - Outdoor Enclosure (see accessories section)

Wiring:
- Power Supply
- 2-Wire RTD
- 3-Wire RTD
- 4-Wire RTD

Panel Cutout: 0.876" x 1.78" (22.3 x 45.2mm) 
or 0.99" x 1.97" (25 x 50mm) with adaptor provided
**532 Series**

**Features**
- Compact and Low-Cost Temperature Display
- Temperature Display in °C or °F
- MIN/MAX Value Retention
- EEPROM Data Backup on Power Failure
- Galvanic Isolation with Reverse Polarity Protection
- Screw Terminal Connectors: pitch 5 mm
- Display Hold Input
- 5 Measurements/second
- J, K, N Thermocouples with External or Internal Cold Junction Compensation
- Easy Programming and Operation

**Specifications:**
- **Supply voltage:** 10-30 V DC, galvanically isolated with reverse polarity protection
- **Current draw:** max. 40 mA
- **Display:** 5-digit display, red 7-segment LED’s; height 8 mm
- **Measuring rate:** 5 measurements/second
- **Display refresh:** 1-2 times per second
- **Data backup:** EEPROM
- **Housing:** housing for control panel 48 x 24 mm acc. to DIN 43 700; RAL 7021, dark grey
- **Ambient temp.:** –20 to +65 °C
- **EMC:** according to EC EMC directive 89/36/EEC
- **Temperature ranges:**
  - J (Fe-CuNi) –210.0 °C to +1200.0 °C
  - K (Ni-CrNi) –200.0 °C to +1372.0 °C
  - N (NiCrSi-NiSi) –200.0 °C to +1300.0 °C
- **Resolution:** 0.1°C (0.1°F) or 1°C (1°F)
- **Linearity error:** < 0.4 % for entire measuring range at an ambient temperature of 20 °C
- **Temp. drift:** 0.1 K/KAmbient

**Order #:**
- 532 = Temperature Display with thermocouple Input
- N7 = Explosion proof housing (see accessories section)
- E200 = Outdoor Enclosure (see accessories section)
533K.2

**Setpoint Generator/ Time Based Process Adjuster**

**FEATURES**
- Function of a digital time controller with analog output.
- Manual functions with direct input or stepped incremental output of the setpoint.
- 4-digit 8 mm high top-quality LED display
- Physical variables output in the form of 0 to 12 V or 0 to 24 mA analogue signals.
- Units of display can be freely programmed and displayed – no conversion of the specified output value required.
- High accuracy of < 0.1% of the final value.

**COST-SAVING AND COMPACT:**
- Ideal for simulation runs without the need for expensive, time-consuming running-in of processes.
- Processes become more cost-effective
- DIN 48 x 24 mm panel-mount housing with installation depth of only 59 mm.

**DESCRIPTION**
The set-point generator / adjuster 533k.2 triggers a standard signal or a freely programmable signal sequence from 0 ... 12 V or from 0 ... 24 mA. The set-point generator / adjuster 533K.2 is a real innovation opening up new application potentials in process technology and automation.

**USER-FRIENDLY:**
- Simpler to run processes than with a PLC or process controller.
- Everything can be programmed easily by means of 2 keys and the text menu.
- Digital setting - no additional DIP switches or potentiometers.
- Display allows simple monitoring of the specified setpoint output.
- Comfortable display form as direct digital value

**Ordering Information:**

*Order*: 533K.2 - Setpoint Generator/Time Based Process Adjuster
TP-554 Series

Features
- Very bright LED display, height 14mm
- DIN housing, 96 x 48 mm
- Programmable operating curve for standard signals, thermocouples, resistance thermometers, etc.
- Programmable operating curve, even non-linear, allowing the use of economical sensors
- Two relay outputs with two preset limit values

Additional features:
- DIN housing 96 x 48 mm
- Character height: 14 mm
- Resolution 14 bits
- Simple menu-driven programming, and operation with 4 keys
- Electrical connections by means of plug-in screw terminals
- Voltage supply: 10-30 VDC or 90-260 VAC
- IP 65/NEMA4 (front)
- Auxiliary power supply output for transducer or sensor
  10-30 VDC: 10 VDC ± 2%, 30mA
  90-260 VAC: 24 VDC ± 15%, 50mA and 10 VDC ± 2%, 30mA
- Hum eliminator (50/60 Hz user selectable)
- Serial interface allows reading of the measured values and set-up programming.

Specifications:
- Display range: -19.999..99.999
- Input ranges:
  0..400 Ω, 0..4000 Ω
  0..100 mV, -100..+100 mV
- Thermocouples
  - Programmable input operating curve with up to 24 reference points
- 2 programmable limit values (TP551; unit without presets, has only 2 buttons)
- Outputs: Two (2) SPDT relays (250 VAC / 3A)
- Programmable hysteresis (on, off, on/off)
- SET key to reset the outputs
- Inputs: thermocouple, millivolt, resistance thermometer with measurement on 2, 3 or 4 wires, RESET to reset the outputs, KEY terminal to lock the front keys.

**BEACON Series**

**Features**
- AC / DC Voltage Inputs (Pos / Neg)
- AC / DC Current Inputs (Pos / Neg)
- AC or DC Supply Voltage
- NEMA 4X / IP65 Front
- Low / High Scaling
- 3 1/2 Digit Display
- Over-Range Indication
- DC Output to Power Peripherals

**Description:**
The BEACON series is a bright new addition to KEP’s product line. Featuring 3 1/2 digits of bright RED or GREEN (optional) LED’s, these meters outshine the competition by offering DIP switch selection of the most frequently used functions. The new BEACON series focuses on applications needing 3 1/2 digits of display, showing -1999 to +1999 with switch selectable decimals. With their great flexibility and multiple input ranges, let the BEACON series digital panel meters be your guide.

**Specifications:**
**Display:**
3 1/2 digit, .55" high, 7 segment bright LED. Minus sign displayed when current or voltage is negative. Decimal points inserted before 1st, 2nd, or 3rd least significant digits by DIP switch selection.

**Power:**
Available in 5VDC, 8-24VDC, 115VAC or 230VAC (±10%).
260 mA (DC); 6 VA (AC).

**Operating Temperature:** +32°F to 130°F (0°C to 60°C)

**Storage Temperature:** -40°F to 200°F (-40°C to 80°C)

**Output Power:** (AC powered units only)
18 VDC regulated ±4% @ 50 mA

**Input Ranges:** (switch/jumper selectable)

<table>

</tbody>
</table>

**Over-Range Indication:** Three least significant digits blank when input is over range.

**Max. Voltage on Basic Range:** 75 V AC/DC (terminals 4 & 5)

**Max. Voltage on Terminal Block:** 300 V AC or DC

**Max Shunt Currents:**
199.9µA through 19.99mA - 10 x (max. range current)
199.9mA - 1 amp
1.999 amp - 3 amps

**Caution:** A fast blow fuse should be installed in series with the current meter in applications where fault currents may exceed maximum allowable current.

**Scaling:**
- **Reference Adjust** (supplied on all units)
  Used to calibrate display to ±30% of STD input.
- **Span Adjust**
  Coarse and fine adjust pots offer + 1 to + 13 and when used with the switch selected ranges, offers direct readout of linear transducers.
- **"0" Offset Adjust**
  Sets "low" input display at ± 50% of span.

**Accuracy:**
(23°C, 85% R.H.)
(Add ± 2 digits to below for negative readings)
DC Volts - .1% of Reading ± 1 digit
AC Volts - ± .1% of Reading ± 3 digits
DC Current

Terminal Designations:
• P1 DISPLAY HIGH Adj. (ref)
• P2 NON "0" INPUT adj. ("0" offset)
• P3 NON STANDARD INPUT COARSE Adj. (span)
• P4 NON STANDARD INPUT FINE Adj. (span)

How To Order
Example: BC 1 DX G

BEACON

Power:
1= 5VDC
2= 8-24VDC (DC ranges jumper selectable)
4= 115VAC  All ranges
5= 230VAC  jumper selectable

Input:
DS=DC Volt/Current display STD Input (no scaling)
D0=DC Volt/Current scale from "0" only
DX=DC Volt/Current scale with "0" offset
A0= AC or DC Volt/Current scale from "0" only
AX= AC or DC Volt/Current scale with "0" offset

Options:
G= Green LED's
S= Small Bezel (2.12" H x 4.01" W)
2A= 0-1.999 A input option
5A= 0-5 Amp input option

Accessories:
BCAL1 = Descriptor Labels: %, °F, °C, Hz, kHz,
  RPS, V DC, mA DC, mV DC, V AC,
  mA AC, mV AC, uA DC, A AC, A DC
BCAL2 = Descriptor Labels: ft/sec, ft/min, ft/hr,
  ft³/sec, ft³/min, ft³/hr, GPM, GPH, RPM,
  in/sec, in/min, in/hr, lb/sec, lb/min, lb/hr
BCAL3 = Descriptor Labels: L/sec, L/min, L/hr,
  m³/sec, m³/min, m³/hr, m/sec, m/min,
  m/hr, kpa, bar, kg, lb, PSI, kW
BCR2A =External .1Ω 1% 5W shunt (0 - 1.999 A)
BCSCALE = Custom Scaling
  (Specify with each unit, see below)

Example: Input IDC 0.004 0.020
  Display 10.0 150.0

Where:
IDC = DC Current, IAC = AC Current
VDC = DC Voltage, VAC = AC Voltage
  Low Range 0.004 = 4 mA
  High Range 0.020 = 20 mA
  Low Display = 10.0
  High Display = 150.0
**HVM-1**

**High Voltage Module for 5 to 240 VAC/VDC Input Signals**

**Features:**
- Opto-Isolation up to 2500 V
- Allows units with 3-30 VDC inputs to Accept Inputs from 5 to 240 VAC or VDC
- Screw Terminal Hookup.
- Low Cost

**Operation:**
Connect the high voltage and the output as shown below. When pulsing with AC, be sure that the counter being driven by the HVM-1 is set for low speed inputs (usually 40 Hz or lower). If this is not done the counter will count each peak of the AC voltage.

**Description:**
The HVM-1 enables products with low DC (3-30V) inputs to accept 5-240 VAC/DC input signals. The unit mounts on the counter or customer panel with the use of double sided tape. The circuitry allows various voltage pulses to be used for counting and provides opto-isolation of 2500V.

Kessler-Ellis Products • 800-631-2165   II-18 • Industrial Instruments • Page 99
**KAL-D06 R/T**

**Features**
- 8 count modes
- Decimal point selection up to 0.000
- 8mm black character high contrast Starburst LCD display.
- Backlight
- 10-30VDC operation
- Maximum input frequency 500kHz (mode dependent)
- Up to Quad X 4 input
- Scaling multiply 0.000001 to 9.999999
- Scaling divide 0000001 to 99999999
- Up to 3 text characters per display
- CE approved

**Description:**
A flexible device designed for many applications, it has 8 modes of operation for count and rate applications, with live scaling of the count and rate it is ideally suited to flow meter applications where the number of pulses per item are not easily defined or specified.

An 8 digit starburst display along with its various count and rate modes with text display makes this a unique product in the market place. Its features include backlight, EEPROM memory for data retention and scrolling display. Programmed through the front panel the KAL-D06 R/T is easy to set up and extremely flexible in its operation. Up to 3 characters can be programmed to appear on the display making it easier for the user to identify the units of measure.

**Miniature, Low Cost, LCD, Totalizer & Ratemeter**

**Specifications:**
- **Supply Voltage:** 13-30VDC. +/-10%
- **Current Consumption:** 15mA, typical
- **Display:** 8 digit, 8mm height, high contrast Starburst LCD characters with leading zero blanking.
- **Electronic Count Input:** 500kHz maximum.
- **Count Range:** 0-99999999
- **Panel Cut Out:** 45mm X 22.5mm
- **Front Panel Sealing:** IP65 sealed when used with clip mount and gasket provided
- **Reset Input (R):** Reset using front panel button.
- **Temperature Range:**
  - Operating: 14 to 140°F (-10 to 60°C)
  - Storage: -4 to 140°F (-20 to 60°C)

**Dimensions**

Panel Cutout: 0.92" x 1.77" (22.5 x 45 mm)

**How To Order:**
- **KAL-D06 RT**......................... 8 digit counter with ratemeter

**Accessories**
- N7 - Explosion proof housing (see accessories section)
- E200 - Outdoor Enclosure (see accessories section)
136K

Features

- Low price and high efficiency
- Large (8 mm) 8-digit LCD display,
- Optional backlighting
- Input frequency range from 1 Hz ... 12 kHz
- Gate measuring method, gate time 1 second
- Accuracy 0.05%
- High voltage input for 10 to 260 V AC/DC voltage pulses
- NEMA4/IP65 Front Panel
- Screw terminals, RM 5 mm

Battery Powered Ratemeter with LCD Display

- Lifetime of the battery approximately 8 years
- Operating temperature –10 to +60 °C
- All versions for positive or negative counting edge

Specifications

Power supply: non-replaceable lithium battery: (lifetime approximately 8 years at 20°C)

Backlighting: external electrical source 24V DC

Display: LCD, 8 decades, 8 mm high characters

Display range: 0 to 99999999

Resolution: 1/sec (1 Hz)

Inputs:

A. Counting input of the DC-versions (max. 30 V DC) Slow counting input: max. 30 Hz NPN Fast counting input: max. 12 kHz (PNP), 7 kHz (NPN)

Switching level:

NPN: Low: 0 -0.7V, High: 3-30V DC
PNP: Low: 0 -0.7V, High: 4 -30V DC

Interference emissions:

EN 55011 Class B, EN 61000-6-2
EN 61010 Section 1 (only AC versions)

Operating temperature:

–10 to +55 °C

Ambient temperature:

–10 to +60 °C

Storage temperature:

–20 to +70 °C

Protection: NEMA4/IP65 front

Weight: approximately 50 g

Dimensions:

PROTROL

Features
- 2 Separate Dividing Scale Factors for Inputs A & B
- 2 Set Points Each With a Hysteresis Alarm Range
- Displays Three Separate Values; A (A Rate), B (B Rate) & C (A-B), (A÷B) or [(A-B)÷B]
- Digital Input Up To 10kHz
- NEMA 4X / IP65 Front

Description:
Featuring 6 digits of bright, 7-segment LED displays, the Protrol is a rate, ratio and draw meter which is field programmable. The two inputs (A & B) each have separate scaling factors. The unit can be programmed to display: two separate ratemeters (A & B), the net difference of A & B, the ratio of A to B (A ÷ B) or the draw [(A - B) ÷ B]. Two assignable set points are standard with a programmable hysteresis (alarm range).

Specifications:
Display
5 digit, .55" high, 7 segment, red orange, LED.
Input Power: 110 ± 15% or 12 to 15VDC; 220 VAC ± 15% or 12 to 15VDC.
Current: maximum 250 mA DC or 6.5 VA at rated AC voltage.
Output Power: (AC powered units only) + 12VDC @ 50mA unregulated -10 +50%
Temperature:
Operating: +32°F (0°C) to +130°F (+54°C).
Storage: -40°F (-40°C) to +200°F (93°C).
Memory: EEPROM stores data for ten years if power is lost.
Reset:
Front Panel: Resets (updates) normalization process.
Remote: Resets control output (if it's in hysteresis and below the preset).
Control Outputs:
2 each N.O. Relay - 5 Amp @ 120/240 VAC or 28 VDC.
(N.C. Relay contacts or NPN sink from 10VDC to .5V @ 100mA available with solder jumpers).
Input:
STD: High Impedance. Open or 0 to 1V (low), 4 to 30V (high) 10K Ohm impedance. 9.99 kHz max. input speed.
OPTION "M": For Magnetic pickup Inputs, accepts 30mV inputs

Set Points: Two control set points are provided. The outputs have a programmable hysteresis alarm range from 0 to 99999
Rate Display: The ratemeters (A&B) update once per second and are accurate to 0.01% FS (± 1 display digit). The unit will sample from 2 to 24 seconds and will compute a weighted average (normalization).
Programming: Set points, decimal points, Scaling from .0001 to 99999, input type, normalization factor, hysteresis alarm range, and security panel lock code are all programmable from the front panel.
Housing: Standard 1/8 DIN, high impact ABS plastic case (NEMA 4X / IP65 front panel).
Shipping Weight: 2 lbs.
Approvals: CE Approved

Terminal Designations:

- 1- COMMON
- 2- N.O.(N.C./NPN)
- 3- COMMON
- 4- N.O.(N.C./NPN)
- 5- A INPUT
- 6- B INPUT
- 7- 12VDC OUT/+DC IN
- 8- -DC (GROUND)
- 9- RESET INPUT
- 10- NOT USED
- 11- A.C. INPUT
- 12- A.C. INPUT

Draw, Ratio & Net Ratemeter

- 2 Stage Panel Lockout
- RS232 or RS422 Communications
Protrol Application:

This application involves the process of shrinking material for pre-shrunk jeans. The process involves the wetting/stretching and drying/shrinking of the material. The KEP Protrol allows the operator to view the rate of the input and output feeds (displays A & B). A third display (display C) allows the user to view A-B, A+B or (A-B)+B. In this application Protrol(1) monitors the wetting/stretch and Protrol(2) monitors the drying/shrink. The wetting process must maintain a 2.4% stretch and the drying process must maintain a 3.2% shrink. Both the wetting and drying functions must have over and under detection if the process exceeds or lags by .1%. For each Protrol there is an over detection lamp and an under detection lamp.

Here's how the Protrol's are set up. Each roller (excluding the feed and take-up rolls) are one foot in circumference. Since there are four targets per rotation, there are four pulses per foot. Therefore, the scaling factors are all set at four. The C display is selected to view (A-B)+B. Both Protrols were field modified for a normally closed (N.C.) B relay.

Protrol(1):
Typically, B1 rotates at 25 RPM and A1 at 25.6 RPM. This yields a 2.4% stretch ([25.6-25]+25=.024). Preset A is set at .025 and preset B is set at .023 (to maintain a .1% tolerance). Relay A is wired to the over detection lamp and relay B is wired under detection lamp.

Protrol(2):
Typically, B2 rotates at 24.8 RPM and A2 at 25.6 RPM. This yields a 3.2% stretch ([25.6-24.8]+24.8=.032). Preset A is set at .033 and preset B is set at .031 (to maintain a .1% tolerance). Relay A is wired to the over detection lamp and relay B is wired under detection lamp.

Now the operator can view the input and output speeds of the wetting and drying cycles, as well as the amount of stretch and shrink. The warning lamps let the operator know if there is a problem prior to the process or after the process.

NOTE: To view the C display in percentage (X100), order MS280.

5800 Series  
**Incremental Shaft Encoder**

**Features:**
- Low Cost
- Short Circuit Resistant Outputs
- Rugged Design to Industry Standard
- Low Power Consumption
- Shock Resistant

**Mechanical Characteristics**
- **Speed:** max. 6000 RPM (12000 RPM above 600 PPR)
- **Rotor Moment of Inertia:** $1.8 \times 10^6$ kgm$^2$
- **Torque:** <0.01 Nm
- **Radial Load Capacity of Shaft:** 20 N (at shaft end)
- **Axial Load Capacity of Shaft:** 10 N
- **Weight:** Approx. 0.4 kg
- **Protective System to DIN 40.050:** Shaft IP64, Cover (IP50 w/ connector)
- **Operating Temperature Range:** 0° C to +50° C (-20 °C to 70°C above 600 PPR)
- **Shaft:** Stainless Steel

**Electrical Characteristics**
- **Output Circuit:** Push-Pull Circuit
- **Supply Power:** 10-30 VDC
- **Current Consumption:** (no load) max. 50 mA (75 mA with reference )
- **Permissible Load / Channel:** max. ±30 mA
- **Pulse Frequency:** max. 20 kHz (100 kHz above 600 PPR)
- **Signal Level High @ 30 mA:** Supply Voltage minus 2.5V (7.5 to 27.5V)
- **Signal Level Low @ 30 mA:** max. 1.5V
- **Signal Level Low @ 1 mA:** max. .7V
- **Rise Time:** max. 1 µS
- **Fall Time:** max. 1 µS
- **Short Circuit Proof Outputs:** yes
- **Standard Pulses Per Revolution:** 60, 250, 600
- **Available Pulses per Revolution:** 10, 20, 30, 40, 50, 60, 80, 96, 100, 120, 125, 127,150, 180, 200, 216, 220, 240, 250, 254, 256, 280, 300, 314, 360, 400, 420, 450, 500, 512, 600, 625, 720, 750, 800, 900, 1000, 1024, 1250, 1270, 1400, 1500, 1800, 2000, 2048, 2400, 2500, 3000, 3600, 4000, 4096, 5000

9000 Series

Incremental Shaft Encoder

Features:
- Low Cost
- Short Circuit Resistant Outputs
- Rugged Design to Industry Standard
- Low Power Consumption
- Shock Resistant

Mechanical Characteristics
Speed: ................................................................. max. 6000 RPM
Rotor Moment of Inertia: ........................................... 15 x 10⁶ kgm²
Torque: ................................................................. <0.05 Nm
Radial Load Capacity of Shaft: ................................... 70 N (at shaft end)
Axial Load Capacity of Shaft: ...................................... 35 N
Weight: .................................................................. Approx. 1.2 kg
Protective System to DIN 40.050: ................................ Shaft IP66, Cover (IP50 w/ connector)
Operating Temperature Range: ................................... 0° C to +50° C (-20 °C to 70°C above 600 PPR)
Shaft: ..................................................................... Stainless Steel

Electrical Characteristics
Output Circuit: .............................................................. Push-Pull Circuit
Supply Power: ............................................................ 10-30 VDC
Current Consumption: (no load)............................... max. 50 mA (75 mA with reference)
Permissible Load / Channel: ........................................ max. ±30 mA
Pulse Frequency: .................................................. max. 20 kHz (100 kHz above 600 PPR)
Signal Level High @ 30 mA: .................................... Supply Voltage minus 2.5V (7.5 to 27.5V)
Signal Level Low @ 30 mA: ........................................ max. 1.5V
Signal Level Low @ 1 mA: .......................................... max. .7V
Rise Time: .......................................................... max. 1 μS
Fall Time: .......................................................... max. 1 μS
Short Circuit Proof Output: ...................................... yes
Standard Pulses Per Revolution: .......................... 60, 250, 600
Available Pulses per Revolution: .......................... 96, 100, 120, 125, 127, 150, 180, 200, 216, 220, 240, 250, 254, 256, 280, 300, 360, 400, 420, 450, 500, 512, 600, 625, 720, 750, 900, 1000, 1024, 1250, 1270, 1500, 1800, 2000, 2048, 2400, 2500, 3000, 3600, 4000, 4096, 5000
Other Pulses Per Revolution available upon request: Consult Factory
Approvals: CE

## Specifications

### Electrical Input
- **Voltage**: 5 to 16 VDC (specify)
- **Current**: 50 Milliamperes
- **Regulation**: ±10%

### Electrical Output
- **Wave shape**: Square Wave
- **Rise Time**: Less than 1 microsecond
- **Current**: Sink 20 milliamperes/operation
- **Pulse rate**: 0 to 6000 Hz
- **Pulses per shaft revolution**: 1 to 100 (specify)

### Mechanical
- **Hollow shaft speed**: 4000 RPM maximum
- **Hollow shaft rotation**: Either direction
- **Bearings**: Sealed ball bearings
- **Bore size**: 0.250" (6.35mm) to 0.875" (22.22mm) dia. (spec)
- **Bore tolerance**: +0.003" (.076mm) to -.000" (.000mm)
- **Running torque**: 10 oz. inches (40.5gm-cm)
- **Operating life**: 100,000 hrs.
- **Housing**: Alum. black anodized finish
- **Cable**: Two 3 conductor shielded, 6 ft. long w/ built-in strain relief
- **Weight**: 8 oz. (227 grams)

### Environmental
- **Temperature**: +32°F (0°C) to +167°F (+75°C)

---

**MODEL 230 - BI-DIRECTIONAL**
The Model 230 Optical Encoder is designed to mount directly on a shaft for bi-directional applications. The encoder produces two symmetrical 50% duty cycle square wave output signals in quadrature relationship to each other. The signals lead or lag each other by 90 degrees depending upon the direction of rotation.
Typical Application:

**ANALOG OUTPUT**

**Minitrol Series**

* When using a 220 encoder with a Minitrol, Protrol or Positrol series, use a 12V encoder with a 5V 1W Zener (as IN4733) or 200Ω 1W dropping resistor between (+) DC supply and red lead. The 230 encoder requires a regulated power supply as KEP 115-12.

Mounting:

- Electrical Cable 6' Long (1.8M)
- Bored to Customer Requirements

- Stop Mounts 4-40 Thread .500" Deep Each Side (12.7)

- (2) 4-40 Set Screws 90° Apart

Circuit Diagram Per Channel:

- **INTERNAL OPTICS AND SQUARING CIRCUIT**
- 10K ohm
- RED +VDC
- WHITE OUTPUT
- BLACK COMMON
- SHIELD GROUND

How To Order:

**Ex: 230 12VDC 50PPR F .500**

Series: 230 Quadrature (2 channels)

Input voltage (specify)
- 5VDC standard voltages
- 12VDC standard voltages
- Others available between 5 and 15 VDC

Pulses Per Rev. (specify)
- Ranges: 1 to 100 PPR

Housing Type
- F = Standard round for hollow shaft

Shaft Bore Size (specify)
- Bore diameter in 1/1000 of inch
- Ranges: .250" to .750"

A flexible housing stop must be provided to prevent improper bearing wear and overheating. Please do not mount outer housing rigidly.
DESCRIPTION:
The 700 optical incremental shaft encoders convert input shaft rotation into square wave output pulses to provide an accurate means of digitizing position, rate or direction of rotation. They are designed specifically for industrial applications requiring a rugged and reliable shaft encoder that is sealed against dust, oil vapor and moisture.

The shaft encoder produces an output signal by rotating a shatter-proof plastic disc with clear and opaque segments between a light emitting diode and a photo-transistor sensor. The output signal from the sensor is then converted into a square wave signal by an internal squaring circuit. The number of output pulses per shaft revolution is determined by the number of clear and opaque segments on the disc. Bidirectional models have a second LED and sensor positioned to produce two square wave signals in quadrature.

SPECIFICATIONS:

ELECTRICAL SPECIFICATIONS

INPUT:
Voltage .................. 5 VDC, or 8 to 30 VDC (Specify Choice)
Current .................. 50 mA ± 10%
Ripple .................... 2%
Regulation ................ ±5%

OUTPUT
Amplitude ................. 80% of input voltage (min.)
Current .................. Sink up to 20 milliamperes (10 milliamperes on multi-output units)
1.5K pull up to input voltage
Polarity .................. Positive
Wave Shape ............... Square wave, 50% "on" and 50% "off"
Pulse Rate ............... 0 to 20,000 pulses per second
Rise Time .................. Less than 1 microsecond
Pulses per Rev .......... 1 to 1270 (Specify choice)
Accuracy .................. Within ±0.1 degrees from one pulse to any other pulse.

ENVIRONMENTAL SPECIFICATIONS

Temperature ........... 0 to 75 degrees C (+32°F to 167°F)
Vibration ............... 3 g’s at 5 to 1000 CPS
Shock ..................... 20 g’s, 10 milliseconds

MECHANICAL SPECIFICATIONS

Shaft Speed .............. 6,000 RPM maximum
Shaft Rotation .......... Either direction
Bearings .................. Sealed ball bearings
Starting Torque .......... 0.10 ounce-inches
Moment of Inertia ...... 0.0025 ounce-inches squared
Radial Loading .......... 10 pounds operating
Axial Loading .......... 5 pounds operating
Shaft Size ............... 250" or .375" diameter (Specify choice)
Shaft Type ............... Single or double ended (Specify choice)
Operating Life ........... 100,000 hours average
Housing .................. Aluminum with black anodized finish, sealed against dust, oil vapor and moisture.
Mounting .................. Provisions for either base or face mounting
Weight ..................... A- 10 oz., B- 3.75 lbs., C- 3.25 lbs.,
D- 6 lbs.
Connector Type .......... 6-pin MS Connector or Solder Terminals
A HOUSING

Optional Shaft Extension (Double Ended)

Removable Side Plates

Flat on Shaft

B HOUSING

Optional Shaft Extension (Double Ended)

Electrical Connector

Flat on Shaft

C HOUSING

Electrical Connector

1/4-20 Tap .50" Deep 4 Mounting Holes on a 2.00" B.C.

A standard housing encoder is positioned inside heavy duty housing.

The same mounting hole pattern is also provided on the opposite end and the base.

6-32 Tap .25" Deep 4 Mounting Holes on a 2.00" B.C.

The same mounting hole pattern is also provided on the opposite end and the base.

Electrical Connector

1/4-20 Tap .50" Deep 4 Mounting Holes on a 2.00" B.C.

The same mounting hole pattern is also provided on the opposite end and the base.

Electrical Connector

1/4-20 Tap .50" Deep 4 Mounting Holes on a 2.00" B.C.

The same mounting hole pattern is also provided on the opposite end and the base.

KEP Magnetic Switches

Features
• CE Approved
• Non Contact Switching
• N.O., N.C. & SPDT Industrial Reed Switches
• Momentary & Bistable Versions Available
• No Switching Power Needed
  (Drives KAL Series without external power)
• Long Life (Estimated 3 Billion Operations)

Switch Operations:
N.O. (third letter “S”) (Closing Switch)
If a permanent magnet (a north pole [red] or a south pole [blue]) is placed near the actuating zone of the magnetic switch, the contact tongues inside the glass sealed gas protected area spring quickly to close position. When field is removed switch opens again.
N.C. (third letter “O”) (Opening Switch)
A contact tongue of a switch is magnetized by an internal magnet with the south pole field. If a south pole (blue) actuating magnet is placed near the magnetic switch, both contact tongues are magnetized with the same polarity. Like poles repel each other and the magnetic switch contact opens. When field is removed switch closes again.
SPDT (third letter “U”) (Change over Switch)
A change over contact has one moveable (COMM.) and two static contact tongues (N.C. and N.O.). When there is no magnetic field, contact tongue rests on the N.C. contact by means of its elastic force. When an actuating magnet is placed near it (north pole [red] or south pole [blue]) the moveable contact tongue switches. The NC contact opens and the NO contact springs to close position. When field is removed, moveable contact returns to rest position.

Bistable (fourth letter “M”*)
By means of an internal polarizing magnet, a contact tongue is magnetized with a south pole field in such a way that when north pole magnet (red) is placed in its proximity the magnetic switch contact changes state. The switch remains in this state until a south pole magnet (blue) is placed in its proximity.

Operating Temperature: 14° to 176°F (-10° to 80°C)

Cable
Length: 39.4" (1 M)
Color:
  Jacket: Gray or Beige 0.22" (5.6mm) diameter
  Inside: 19 ga.
    N.O.: Brown & Blue
    N.C.: Black & Blue
    SPDT: Brn (comm), Blue (N.C.), Blk (N.O.)

NOTE: Some cables may have extra green/yellow wire connected to metal case.

**D Series**

**Inductive Proximity Sensors**

**Features:**
- CE Approved
- Low Cost
- Non Contact Sensing of Any Metal
- No Magnets Needed
- Low Power Consumption
- Shock Resistant

The D Series comes in three sizes, all in the easy flush mount type. Both NPN (sinking) or PNP (sourcing) types are available. They sense any conductive metal surface within range of their sensing coils. They do not require a magnetic target and are perfect for our ratemeters and counters. An LED indicator lights during activation.

INDUCTIVE PROXIMITY SENSOR for use with KEP Counters and Ratemeters

Applications: Our D Series switches interface easily with our full line of counters and ratemeters. Use PNP switches (D_P) on all KEP units except KAL Series, which requires NPN (D_N) switches.

PD Series

Features:
• Low Cost
• Non Contact Sensing
• Various Sensing Types
• Low Power Consumption
• Shock Resistant

Description:
The PD Series photoelectric sensors offer superior optical performance in a miniature 18 mm package. Designed specifically for a wide variety of applications, including food processing, packaging, and materials handling. Their miniature size makes it easy to design into any system.

The PD Series provides flawless operation in the harshest environments. Rated NEMA 4, 6, and 13, the PD Series keeps working in wet and high-pressure washdown situations even under water. The PD Series is highly immune to extreme shock and vibration, and passes the NEMA ICS 1-109 showering arc test. Even walkie-talkies won’t interfere with its performance.

PD Series sensors are available in 10-30 VDC thru-beam, reflex, and proximity configurations. Infrared, visible-beam, and polarized models are available, as is a complete line of fiber optic cables. Easy alignment is provided by a variable intensity indicator (patents pending) on all models, and by an additional forward-looking alignment indicator on thru-beam models.

The unique “round and square” profile makes installation easy. It can be screwed into standard 18 mm threaded brackets. Bulkhead mounts are mounted flush against any surface. Electrical connections are made via an all purpose cable.

New From KEP—Sensi Prox…
The PD Series introduces a photoelectric breakthrough: SENSI-PROX. Unlike other proximity sensors whose signal strengths drop off gradually, KEP’s SENSI PROX proximity sensor has an extremely sharp cut-off. Because of this, SENSI PROX sensors provide superior background suppression and absolute detection at precise distances.

Accessories:
Retroreflectors and mounting brackets are available to complete the installation of your PD Series sensor.

Specifications:

**ELECTRICAL (all models)**

- **Input voltage:** 10-30 VDC (above 55°C derate to 24 VDC at 70°C)
- **Power dissipation:** 1W max
- **Response time:**
  - Dark-to-light: 1 mS max
  - Light-to-dark: 1 mS max
- **Sensitivity adjustment:** 20:1 ratio
- **Power on delay:** <300 mS

**Output type and rating:**

Source and sink transistors:
  - **Sourcing:** 100 mA max
  - **Sinking:** 250 mA max (above 55°C, derate sinking output to 120 mA max at 70°C) Off-state voltage: 30 VDC max
  - Off-state leakage: 10 µA max

**Light/Dark Operation:** When the Lt/Dk control is in the Lt position (fully clockwise) the outputs turn on when the beam is complete. When in the Dk position, the outputs turn on when the beam is broken.

**Alignment Indicator:** LED intensity varies with signal strength to aid alignment. LED status:
- **OFF:** power is off
- **DIM:** power is on, but beam is broken
- **BRIGHT:** power is on, and beam is complete (unbroken).

**Intensity varies with signal strength.**

**Mechanical/Environmental:**

- **Operating temperature:** -20°C to +70°C (-4°F to +158°F)
- **Storage temperature:** -20°C to +70°C (-4°F to +158°F)
- **Humidity:** 95% RH, noncondensing
- **Case material:** Rigid Polyurethane
- **Lens material:** Polycarbonate
- **Vibration:** 30g or 0.06 in displacement, whichever is less, from 50 Hz to 2 kHz
- **Shock:** 100g for 3 ms 1/2 sine wave pulse

**Ratings:** NEMA 4, 6, 13

**Mounting:** Side or 18 mm thru-hole (see dimensions).

**Cable Length:** 6 feet

Side mounting: Use #4 screws to attach the sensor to a wall or mounting bracket. Thru-hole mounting: The sensor can be mounted through an 18 mm (0.71 in) diameter hole using nuts included with the sensor.

**NOTE:** All sensors UL and CSA approved.
WIDE-ANGLE THRU-BEAM
PDS 25 — 10-30 VDC source
PDD 25 — 10-30 VDC detector
Maximum range: 25 ft.
Effective beam: 0.25 in diameter
Field of view: 40 in. at 100 in.
Sunlight immunity: 10,000 footcandles

VISIBLE-BEAM SENSI PROX
(Diffused)
PROXIMITY
PDP02 — 10-30 VDC
This sensor has a precise gain cut-off (from an excess gain of 20 to 1 in 150-thousandths of an inch) which makes it ideal for applications in which background suppression is necessary. This sensor also emits a visible beam of light for easy alignment.
Maximum range: 2.25 in.
Optimum range: 0 to 2.25 in.
Detection spot diameter: 0.1 in. at 2 in.
Sunlight immunity: 10,000 footcandles

SHORT-RANGE PROXIMITY
(Diffused)
PDP08 — 10-30 VDC
Maximum range: 8.0 in.
Optimum range: 0 to 4.0 in.
Field of view: 2 in. at 5 in.
Sunlight immunity: 10,000 footcandles

VISIBLE-BEAM REFLEX
PDR25 Series — 10-30 VDC
This sensor emits a visible beam of light for easy alignment.
Maximum range: 25 ft.
Optimum range: 0 to 15 ft.
Field of view: 2 in. at 100 in.
Sunlight immunity: 10,000 footcandles

POLLARIZED
VISIBLE-BEAM REFLEX
PDR15 Series — 10-30 VDC
The polarized reflex sensor responds only to light reflected from a hard surface retroreflector as T3.0 or T.5. It does not respond to most reflective tapes nor shiny objects. This feature is important in applications where shiny objects such as cans or bottles are to be detected. This sensor also emits a visible beam of light for easy alignment.
Maximum range: 15 ft.
Optimum range: 0 to 10 ft.
Field of view: 1 in. at 50 in.
Sunlight immunity: 10,000 footcandles

FIBER OPTIC SENSOR
PDF Series — 10-30 VDC
Special purpose sensor for use with the plastic fiber optic cable family. Fiber optic cables plug into sockets on the front of the sensor. Sensor operates in thru-beam or proximity mode depending on the fiber optic cable selected.
Maximum range:
0.65 in. for 0.04 in. fiber optic cables in proximity mode.
6 in. for 0.04 in. fiber optic cables in thru-beam mode.
0.3 in. for 0.02 in. fiber optic cables in proximity mode.
1.5 in. for 0.02 in. fiber optic cables in thru-beam mode.
Field of view: Depends on fiber optic cable selected
Sunlight immunity: 10,000 footcandles
HOW TO PICK THE RIGHT SENSOR

1) Most applications can be satisfied with a reflex unit, one that sends out a light signal to bounce off a reflector back to the source. This unit is ideal for sensing ranges from 1" to 15 ft. Use P/N PDR Series and order a PDA T.5 or PDA T3.0 reflector.

<table>
<thead>
<tr>

<td>A single reflex control detects boxes anywhere on a four foot wide conveyor. Interfacing the control with a KEP counter provides totals.</td>
</tr>
<tr>
<td>PDA3.0</td>
<td>Retroreflector</td>
<td></td>
</tr>
</tbody>
</table>

2) If you have shiny objects to be detected like metal cans or covered in shiny shrink wrap that might accidentally act as a reflector and trip the sensor, use the Polarized reflex unit. It works best to 10 feet. Use a PDR15 and a hard surface target reflector.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>PDR15</td>
<td>Polarized Reflex Sensor</td>
<td></td>
</tr>
<tr>
<td>PDAT3.0</td>
<td>Retroreflector</td>
<td></td>
</tr>
</tbody>
</table>

3) If you can look directly at the object to be sensed and there are no objects to false trigger the unit, you only need to look 4 inches or less to see the object. Use PDP08.

4) If you want to look out only 2 inches and ignore objects very close to that range, we have a special product with total background suppression. Use PDP02.

<table>
<thead>
<tr>
<th>MODEL #</th>
<th>DESCRIPTION</th>
<th>FILTER PAPER LENGTH CONTROL</th>
</tr>
</thead>
<tbody>
<tr>
<td>PDP02</td>
<td>Sensi Prox</td>
<td>A fixed-focus proximity control with the standard output interfaces with a KEP Counter to measure a specific length of corrugated automotive filter paper. The control detects the presence or absence of a corrugation. When a predetermined number of corrugations has been detected, the Keptrol or Intellect counter closes a relay, which directs a shear to cut the paper.</td>
</tr>
</tbody>
</table>

5) If you have to look very far or if you are looking thru a very smokey or dirty area, thru beam sensors are the most powerful type of photo-electrics because the light only travels one way. It leaves the source and is received at the detector. Of course, you will have to buy and wire two separate units for a thru beam application. Use PDS25 and PDD 25.

6) Now if you really have some special requirements — small space, high temperature, intrinsic safety needs or very small object detection, use our Fiber Optic Unit. Use P/N PDF00 with appropriate fibers ordered separately.

**N7 HOUSING**

**Explosion Proof Housing for N7 Hazardous Areas**

Use With the Following KEP Models: MK Series, B Series, BVA Series, MVS Series, KAL-D Series, 520 Series and KAT-SP Series

**Description:**
Most KEP series totalizers and Elapsed Timers (less than 3.1” deep) can be factory installed in this explosion proof housing. An optional approved local pushbutton located on the housing provides reset (for units with electric reset) without violation of safety requirements. Electrical reset can also be located at a remote station.

When safe conditions exist, the screw-on cover with its glass window may be removed for field wiring, maintenance or to change preset values.

The housing may be drilled and tapped to customers requirements, up to 2” NPT. Unless otherwise specified, housing is drilled and tapped for 1/2” NPT as illustrated and 3/4” NPSM if reset button is ordered.

**Specifications:**

**Rating:**
- Class I, Groups C & D
- Class II, Groups E, F, G
- Class III

**Max. Depth Behind Panel:** 3.1”

**Max. Hight Above Panel:** 0.625”

**Weight of Housing:** 6 lb. Max.

**N3, N4, N12 HOUSING**

**Features**
- NEMA 12 - Dust and Oil Tight
- NEMA 3 - Waterproof for Outdoors
- NEMA 4 - Waterproof for Indoors
- 14-Gauge Welded Seam Construction
- For Use with MK16/18 Counters and M16/18 Timers

**Description**
The MK series counters and M series timers may be supplied in the NEMA 3, 4 or 12 enclosure. The removable covers have wide neoprene gaskets and are held by captivated screws which thread into sealed wells in the enclosure body. 14-gauge welded seam construction is used for throughout. Finish is baked blue hammertone over phosphorized surface. The lexan window will not shatter or discolor. The enclosure is available for MK16, MK18 series counters and M16, M18 series timers.

**Type of Counters:**
- **MK16.10** - 6 digit, no reset
- **MK18.10** - 8 digit, no reset
- **MK16.12** - 6 digit, push button reset
- **MK16.12KS** - 6 digit, key reset

**Type of Timers:**
- **Mxx16.10** - 6 digit, no reset
- **Mxx18.10** - 8 digit, no reset
- **Mxx16.12** - 6 digit, push button reset
- **Mxx16.12KS** - 6 digit, key reset

**How To Order:**
*(add suffix to part number of counter/timer)*
- **N-12** - NEMA 12, industrial dust and oil tight
- **N-3** - NEMA 3, dust tight, rain tight and sleet & ice resistant - for outdoor use
- **N-4** - NEMA 4, water dust tight - for indoor use

E200 Plastic Outdoor Enclosure

The E200 is a Plastic NEMA 3R raintight enclosure with hinged door and latch. It offers provisions for mounting up to four of ANY KEP 1/32 DIN sized units. The E200 also offers five combination 1/2"-3/4" knockouts: In bottom, sides and back for easy wiring and conduit connections. Exterior Size: 6.5" x 10" x 3.75" deep. Interior Size: 4.75" x 7.75" x 3" deep. Dark grey plastic finish.

Compatible with all Standard 1/32 DIN Products Including:
- KAL D Series
- KAL D Time Series
- 130K - 136K Series
- 520K - 530K Series

Features

- Low Cost
- Compatible with all Standard 1/32 DIN Products
- NEMA 3R (raintight) Enclosure
- Quick-Release Latches with Security Lock Provision
- Light Weight
**NEMAtrol**

### Features
- Compatible with all Standard Size "trol", SUPERtrol & 1/8 DIN Products
- Meets NEMA 4X/IP65 Specs.
- Quick-Release Latches
- Light Weight

### Application:
Ideal for use in most petro-chemical plants, sewage plants, food processing areas, packing plants, electro-plating plants, etc.

### Construction:
- Molded fiberglass reinforced polyester material has excellent chemical resistance and outstanding physical properties.
- Fiberglass material is easily punched, drilled, filed or sawed.
- Oil-resistant gasket attached with oil-resistant adhesive.
- The enclosures have corrosion-resistant fiberglass hinges and spring-loaded fiberglass latches attached with monel screws.

### Application:
- Oil-resistant gasket attached with oil-resistant adhesive.
Installation Of Electronic Instruments
In Industrial Environments

1) **Supply line**
   An MOV (metal oxide varistor) placed across the supply lines at the unit often clips the high voltage spikes sufficiently to prevent malfunction. A line filter offers added protection (See Figure A). For areas where there are large power surges caused by switching on and off large motors, solenoids, welders, etc. or by electronic switching of large variable speed drives, it may be necessary to install lightening arrestors or isolating power supplies to run the electronic equipment.

2) **Relay Contact**
   Arc suppression is needed across inductive loads such as solenoids, motors, or even other small relay coils driven by relay contacts. When the contact opens, large electrical spikes are generated. These noise spike, in addition to degrading the relay contact, can radiate off the output lines and into sensitive areas of the equipment. The best way to alleviate this situation is to suppress the spike at the coil itself.

   For DC powered coils a simple diode as IN4000 Series placed across the DC coil is usually very effective (cathode-banded side of diode connected at more positive side of coil and anode connected to other side of coil. See Figure B.)

   For AC powered coils, an MOV placed across the coil clamps the voltage and usually eliminates the malfunction. Another method to suppress the noise is to place a capacitor across the coil. A .05 to .1 µF ceramic capacitor rated at 3 times the operating voltage will slow down the rise of the spike thus lessening harmful effects. At times a combination of the MOV and capacitor is needed to clamp the voltage and slow down the rise.

   For AC or DC powered coils, a Resistor-Capacitor Surge Suppressor placed across the coil will extend the life of relay contacts and will reduce the possibility of electronic instruments being adversely affected by electrical noise. The Surge suppressor should be connected directly on the coil terminals of the load device being suppressed. If this is not possible, connect the suppressor at the terminal strip closest to the load being suppressed. The suppressor should be connected in parallel with the inductive load.

3) **RFI Noise Through The Air**
   If electrical noise cannot be suppressed, it is recommended that any electronic equipment be mounted away from the relay coils, solenoids or other noise sources to avoid RFI or EMI caused malfunction. Often it is sufficient to separate the two by 6" to 12" but metal shielding or separate cases may be necessary where there are strong fields from relay coils, solenoids, welding equipment or large motors.

4) **Signal Input Lines**
   Input signal lines should be run separately from power lines or lines that may have large surges that may couple into the signal lines. They should not be run in the same trough nor bundle as power lines. It is a good practice to run these low current signal lines through shielded cable with the shield tied to DC ground at the source. Tying the shield to earth ground is recommended only if there is still noise interference after the unit is installed. As often as not, the shield connected to ground causes as many problems as it solves. If the shield is tied to earth ground it should be connected at one place, ideally close to the DC ground.

### Optional Arc Suppressors
